

TOKENIZATION SOLUTIONS AT YOUR FINGER TIPS

Project : “Dopul” DGold DSilver & Other Commodities

PROOF OF CONCEPT

Decentralized TOKENIZATION OF GOLD & SILVER AND OTHER COMMODITIES

In Partnership with

**Tax Planning Corp & Real Estate Brokerage
(Canada & USA) Richmond Hill**

Over 20 ++ Years Experience in

- Traditional Finance – Real Estate / Funding / Loans / Grants / Taxes
- Bridging TradFi & DEFI to Deliver Value & Cash FLOW for Stakeholders & Private investors & High Net worth Clients
- Development of New Blockchain Projects
- Fund Raising for New Projects & Business Ventures
- **Funding & Grants – Education & Business Owners & Corp.**
- Air Drop Marketing for New Projects & Existing
- (AngelsOfRyina & Functionland & NODLE & DOGE & Shiba INU)
- Education for Trading to Generate Profit using DEX or CEX
- Host Meetups (Public & Private) – To Educate Average People to Use Crypto Assets And Blockchain Products- And Generate Profit & Revenue

About Us

- Jerry Cabral - Founder / Project Director
- *Innovator in Residence*
- *Sponsor: Quantum Leap Labs & ICP Hub North America - Canada & USA*
- *Winner Of George Brown College Hackathon (Casa Loma Campus)*
- *Dated May 2024*

DGold DSilver

- Aka: DPMAC tokens
- Aka: Dopul Protocol

**DGold
DSilver
Global
Ecosystem**

- Decentralize Precious Metals And Commodities (DPMAC) tokens
- Dominus Opulentia (Dopul) Protocol
- Tokenization of Precious Metals & Commodities As a Service (TOPMACS) with Blockchain As a Service (BaaS) Dapp/System.
- 26th June 2024

OUR Project Supporters & Encouragement

- **Main Sponsor:**
 - **Quantum Leap Labs & ICP Hub Canada USA**
- **Round 1 Funders : TBA**
- **Round 2 Funders : TBA**
- **VIP EARLY SPONSORS & Supporters
& Friends & Business Associates**
 - **TEAM Kartik**
 - **Z8x Private Dao Group**
 - **AngelsOfRyina.com**
 - **Bitcoin Bay**

Disclaimer

- This Document represents a work in progress. The concepts, plans, and details outlined herein are subject to change as the project develops and as new insights are gained during its implementation. **The information provided is for informational purposes only and does not constitute financial, legal, or investment advice. Participate in this project if you believe this project will deliver value to the global community and make a difference.**
- REFER to the White Paper for More Details about the Project. This DOC will Guide the :
 - Community of Investors
 - Project & Technical Teams
 - Marketing Team & Project Support Community

1.1 Current Problem & Issues - Gold Silver & Other Commodities

- 1. Major Banks, Investment Firms, Central Banks, and Wealthy People Holding Precious Metal assets.**
- 2. Many average people Have Gold Silver accounts in their Retirement Accounts NOT generating Any Profit or Rewards.**
- 3. Most of New Real World Asset RWA Projects are Centralized & Controlled By BIG companies**
- 4. Most RWA projects ENCLOSED inside a Blockchain OR Operate as Sub System with High dependency on the Main Blockchain.**
- 5. Lots of Friction & Difficulty for the Average Person to Get Access to Blockchain based Gold or Silver asset.**

1.1 Mission

1- Empower Billions of People From All Parts of the World to Get Easy Access to Gold & Silver & Commodities Digital based Assets using Blockchain Driven Web3 Based Applications with ZERO Friction

2- Provide Tools to Developers and Entrepreneurs to Build Various Types of Apps to Create a MASS Movement for Liquidity o Digital Assets

3- Reward Leaders and Supporters for building the global network

1.1 OVERVIEW - Project Vision

Blockchain as a Service

Developing a BaaS

**Model for the
tokenization of precious
metals and
commodities**

Decentralized Protocol

**Establishing a decentralized
blockchain protocol for
global interaction in
precious metals and
commodities**

Token Management

**Managing tokens
through DAO, NFT
creation, validation and
staking**

Ecosystem Capacity

**Creating an ecosystem
capable of handling
vast amounts of
precious metals and
commodities**

Global Operations

**Ensuring the system operates
across multiple countries,
blockchains and currencies**

**Integrate with
Other**
Gold Silver Systems
Registered
Custodians
Investment Firms
Mining Companies
IRA, 401k, RRSP, TFSA
Security
Companies

**963 Billion
Tokens**
15% Investors &
VCs
21% Founders &
Teams
64% DAO Treasury
& Public

Our Solution: Using Dopul DGold DSilver

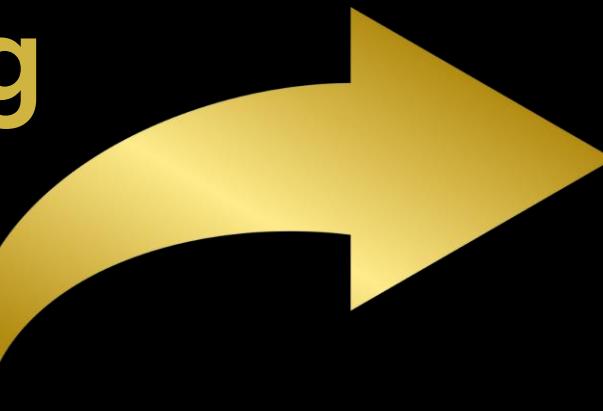

Implementing DGold and DSilver Solutions

Easy Onboarding –
Users can start
using DGold and
DSilver within
minutes

Example : Using
Zero Knowledge
ID Proof
Get GOLD in Canada
And Redeem in UK

Decentralization – Gold, silver and commodities are decentralized with self-custody or third-party custodians.

User Incentives –
Users are incentivized to engage in ecosystem activities like staking and voting.

Customer Value Chain Integration –
Integration with other projects and traditional financial systems are established.

DOPUL Project Opportunity

\$18 Trillion Global GOLD /
MCAPV

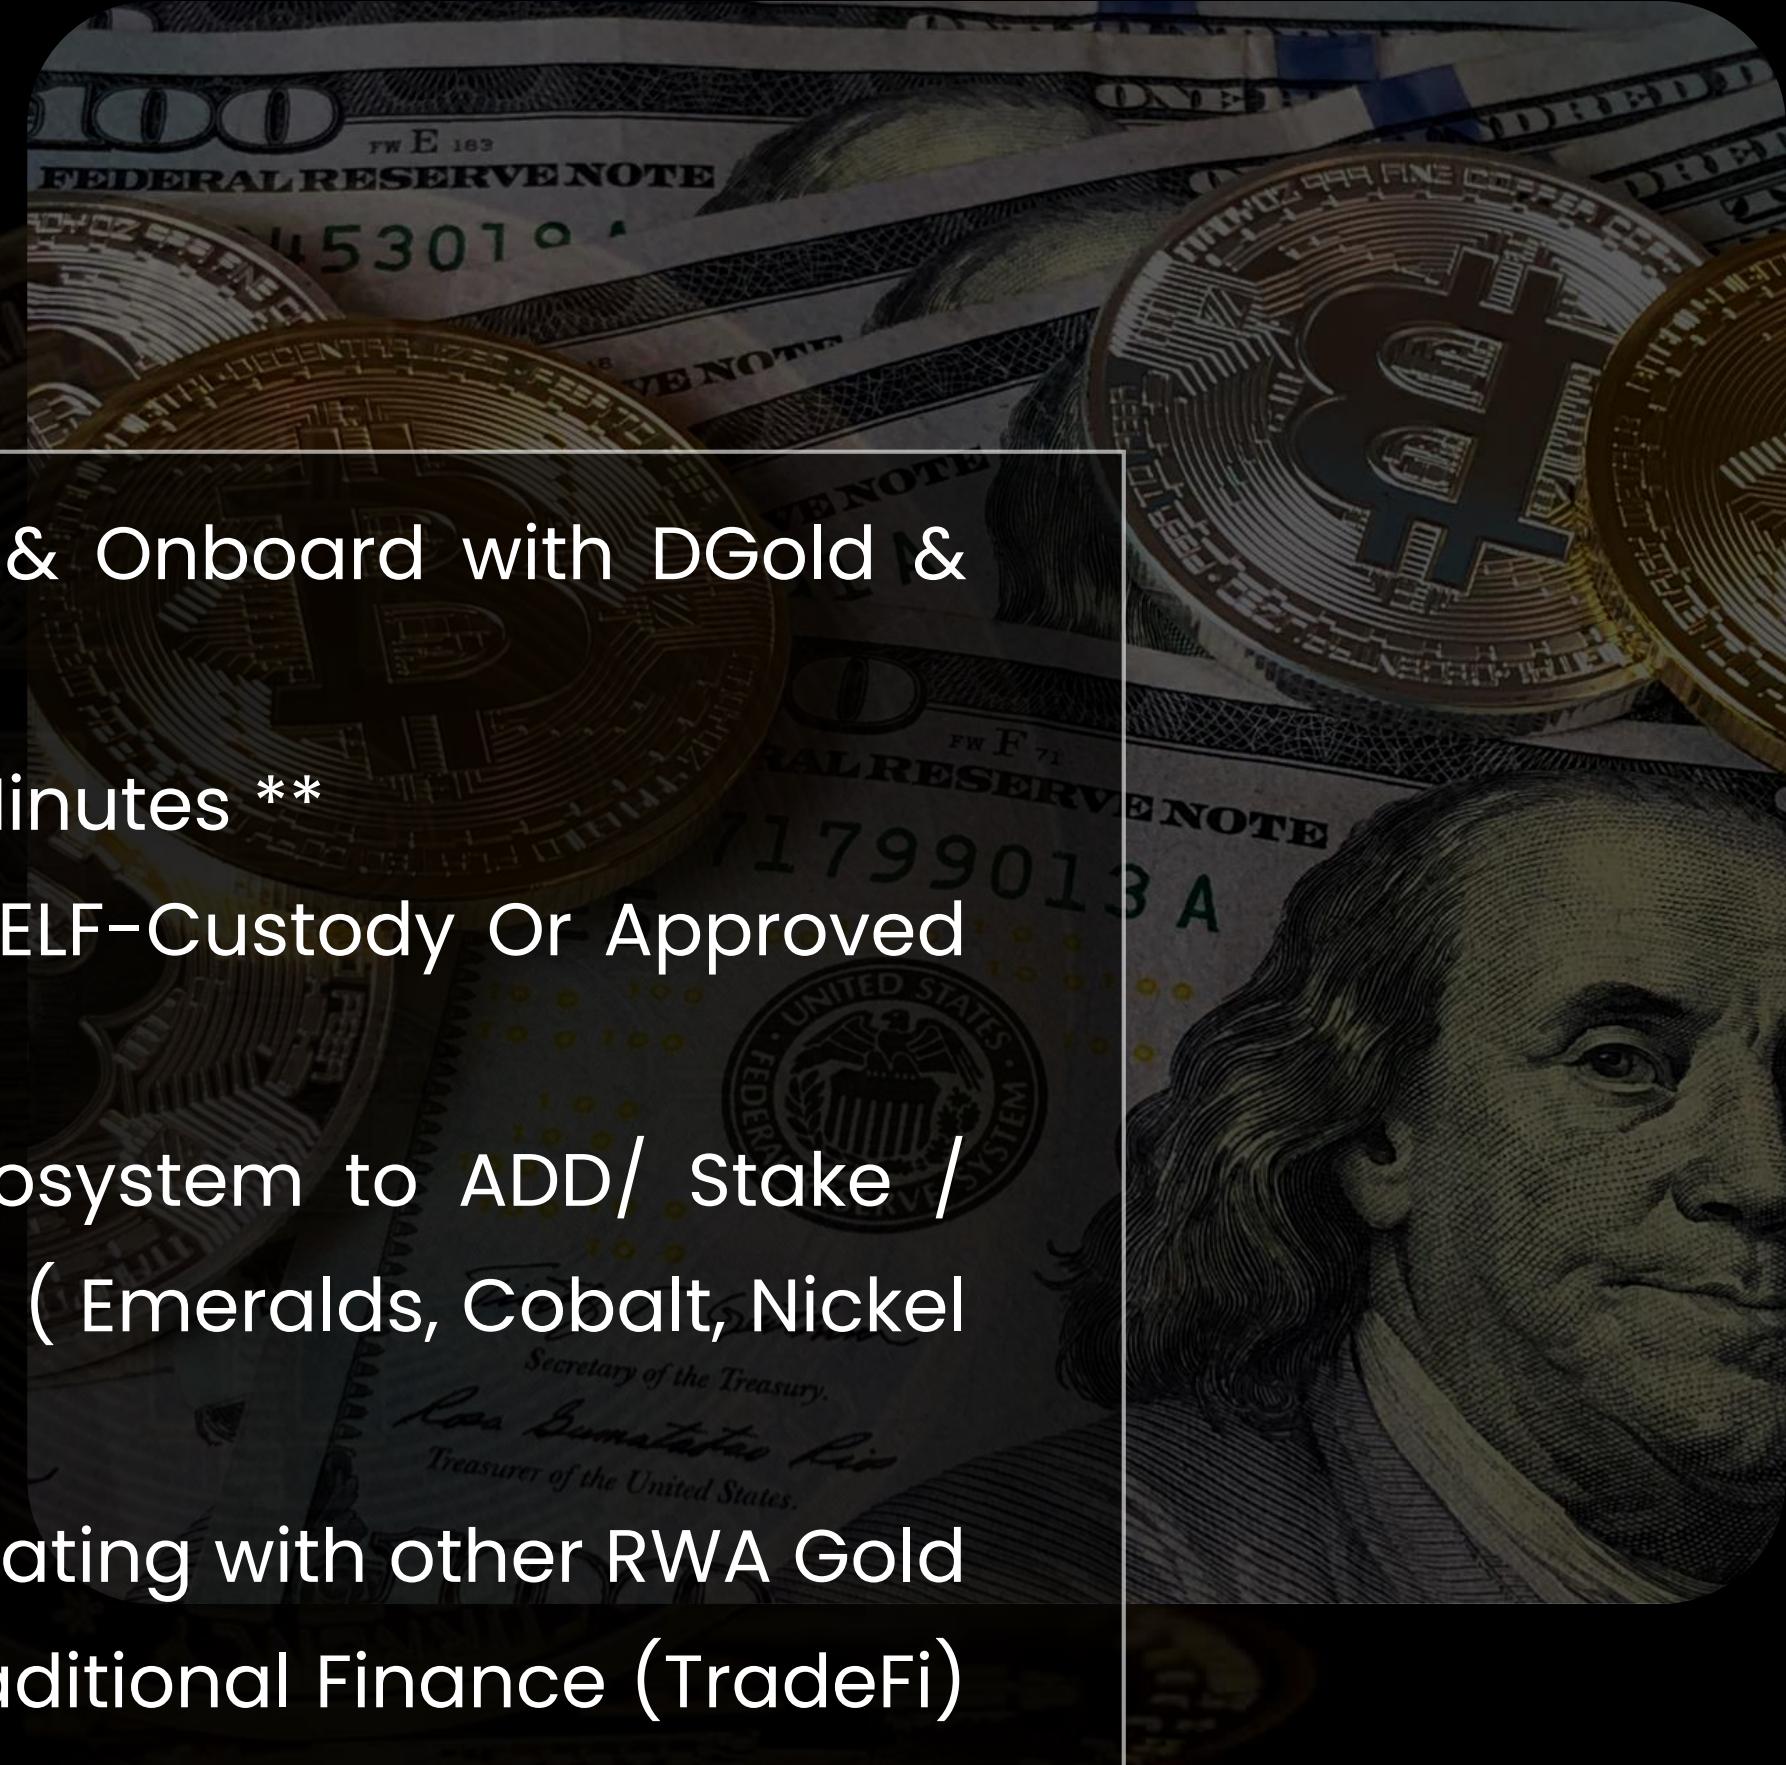

\$2 Trillion Global Silver /
MCAPV

For ALL RWA
(Real World Asset) Projects:
Less than \$5 Billion in MCAPV represent RWA.

MCAPV – Market Capital Value

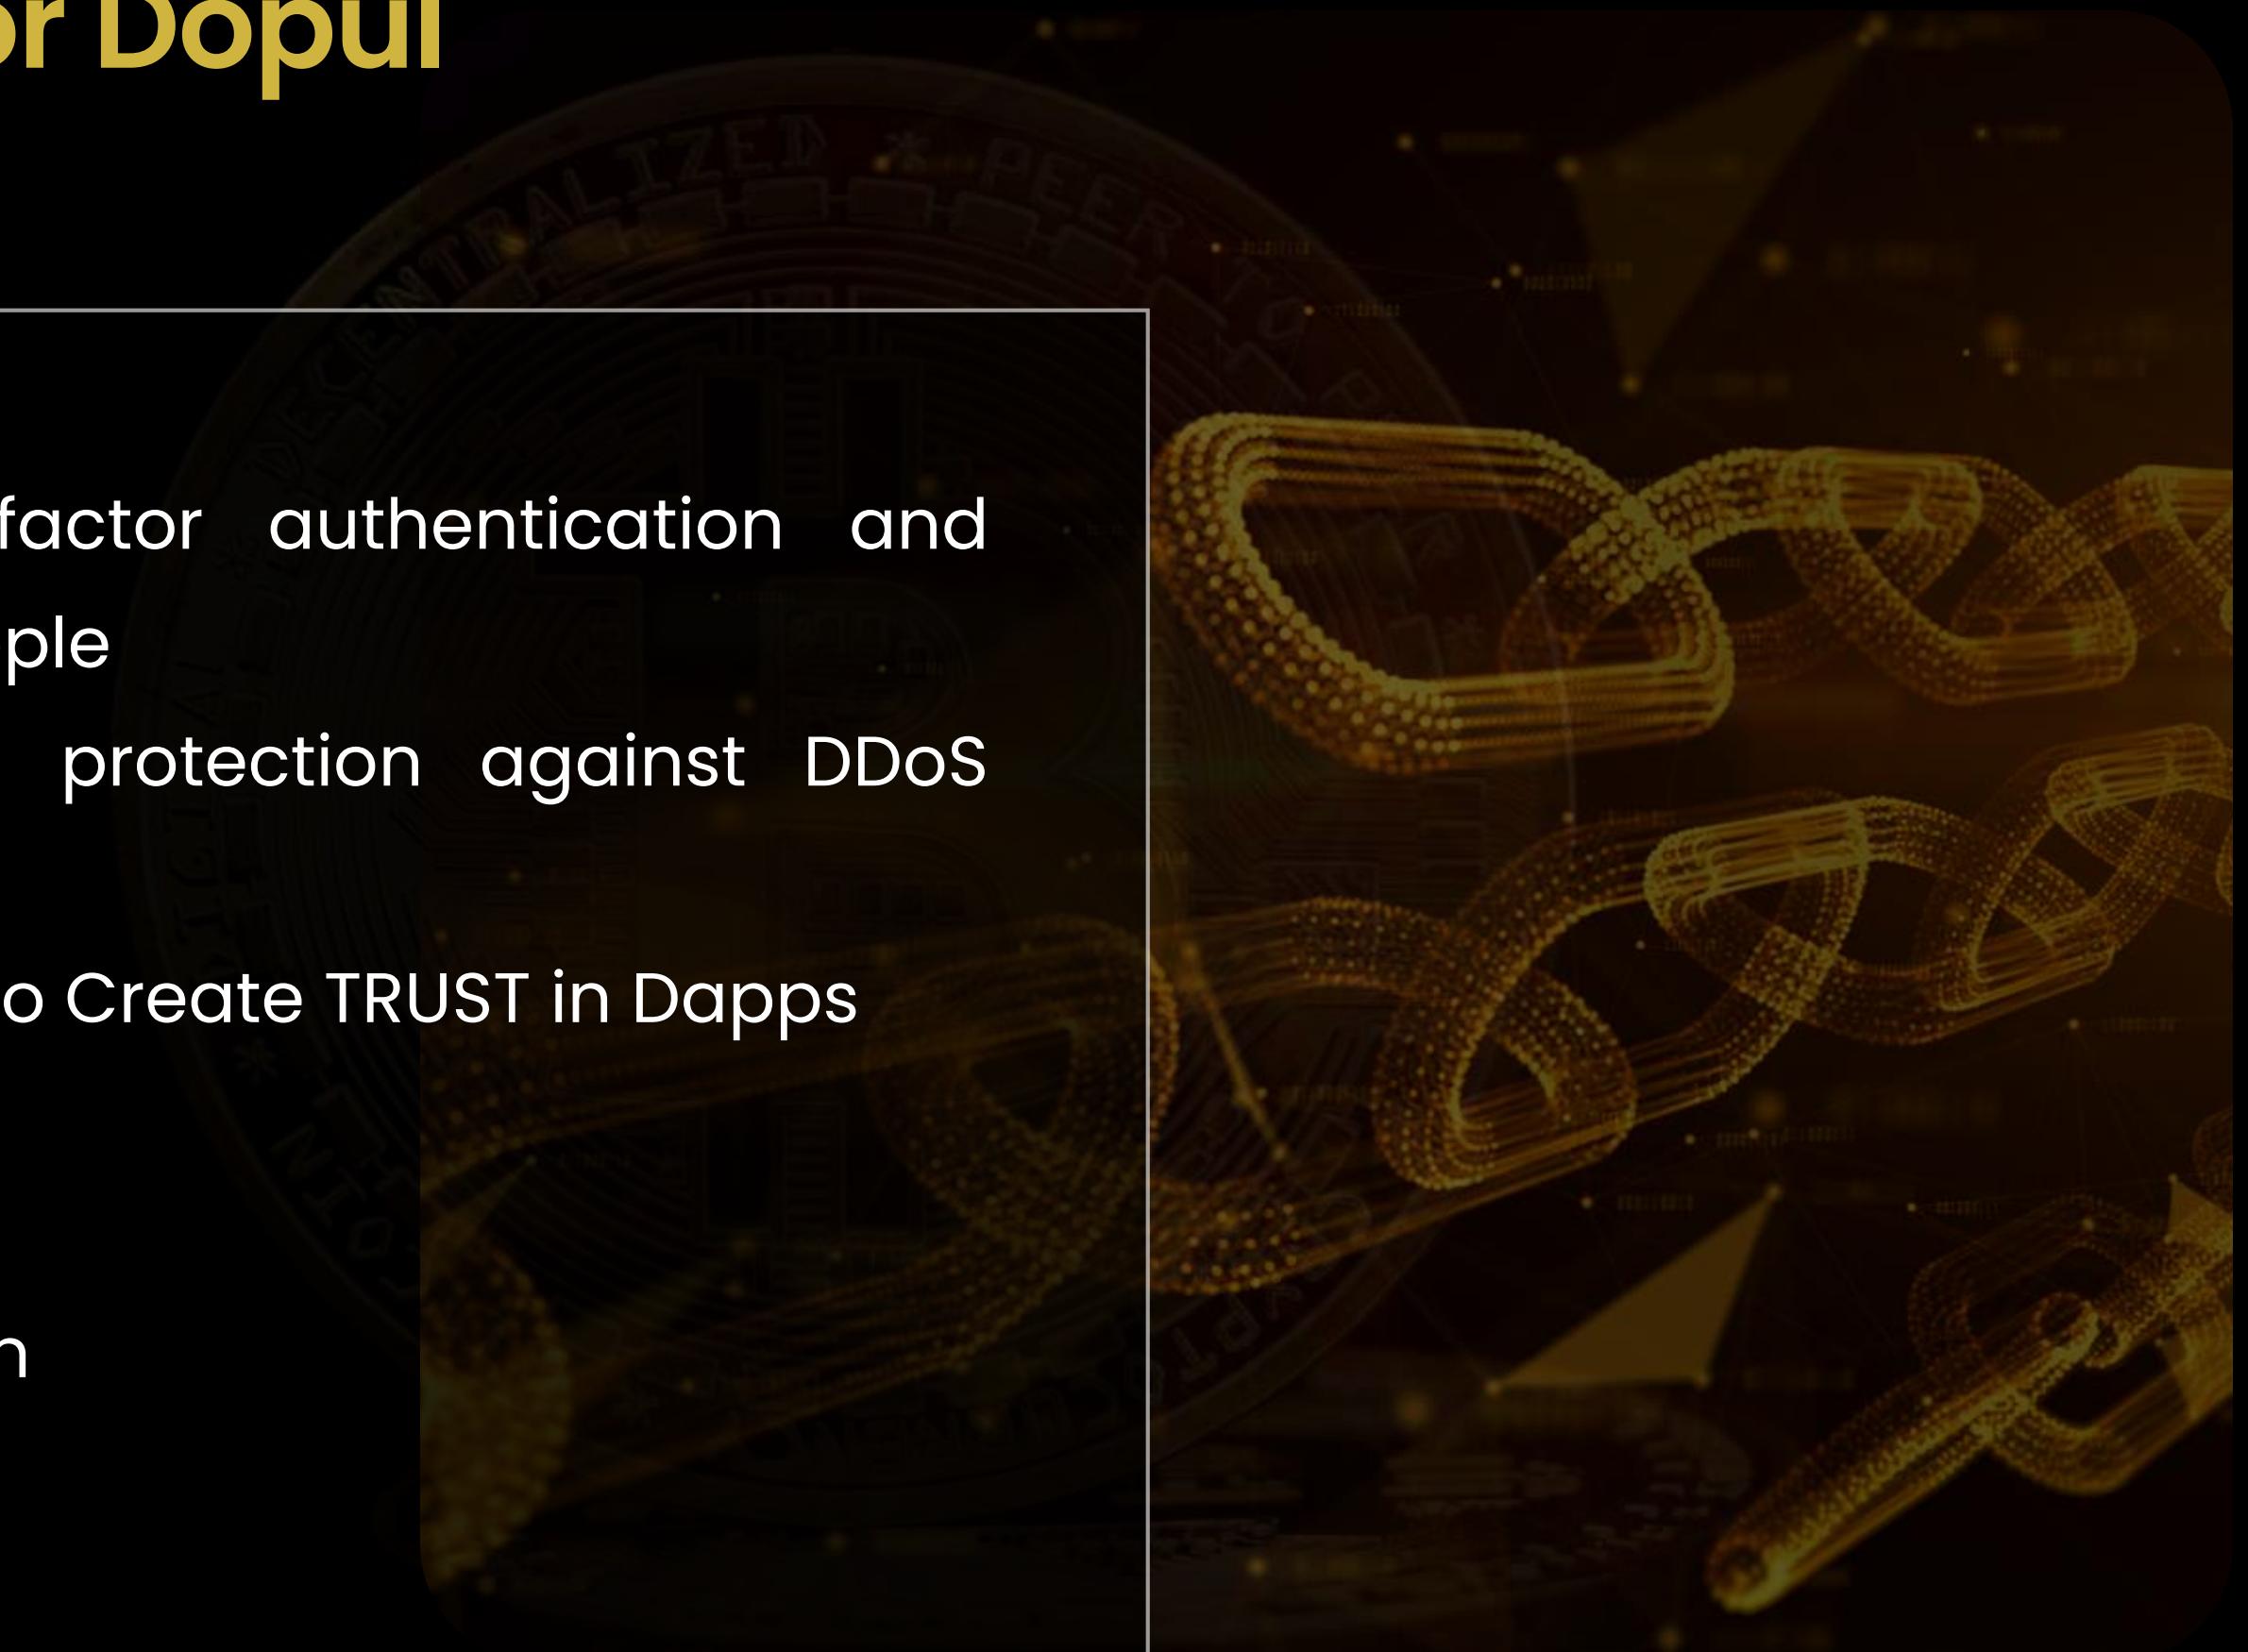

Our Solution: Using Dopul - DGold - DSilver

1. Very Easy for People with Zero Friction to USE & Onboard with DGold & DSilver.
2. ** Any Motivated Person Can Start Using it in 5 Minutes **
3. Decentralize Gold, Silver & Commodities with SELF-Custody Or Approved 3rd Party Custodian
4. INCENTIVIZE & REWARD Users/People in the Ecosystem to ADD/ Stake / Vote / Transfer Gold Silver & other Commodities (Emeralds, Cobalt, Nickel etc.)
5. Create a Customer Value Chain (CVC) By Integrating with other RWA Gold Silver, Commodity Projects OR Integrate with Traditional Finance (TradeFi) system

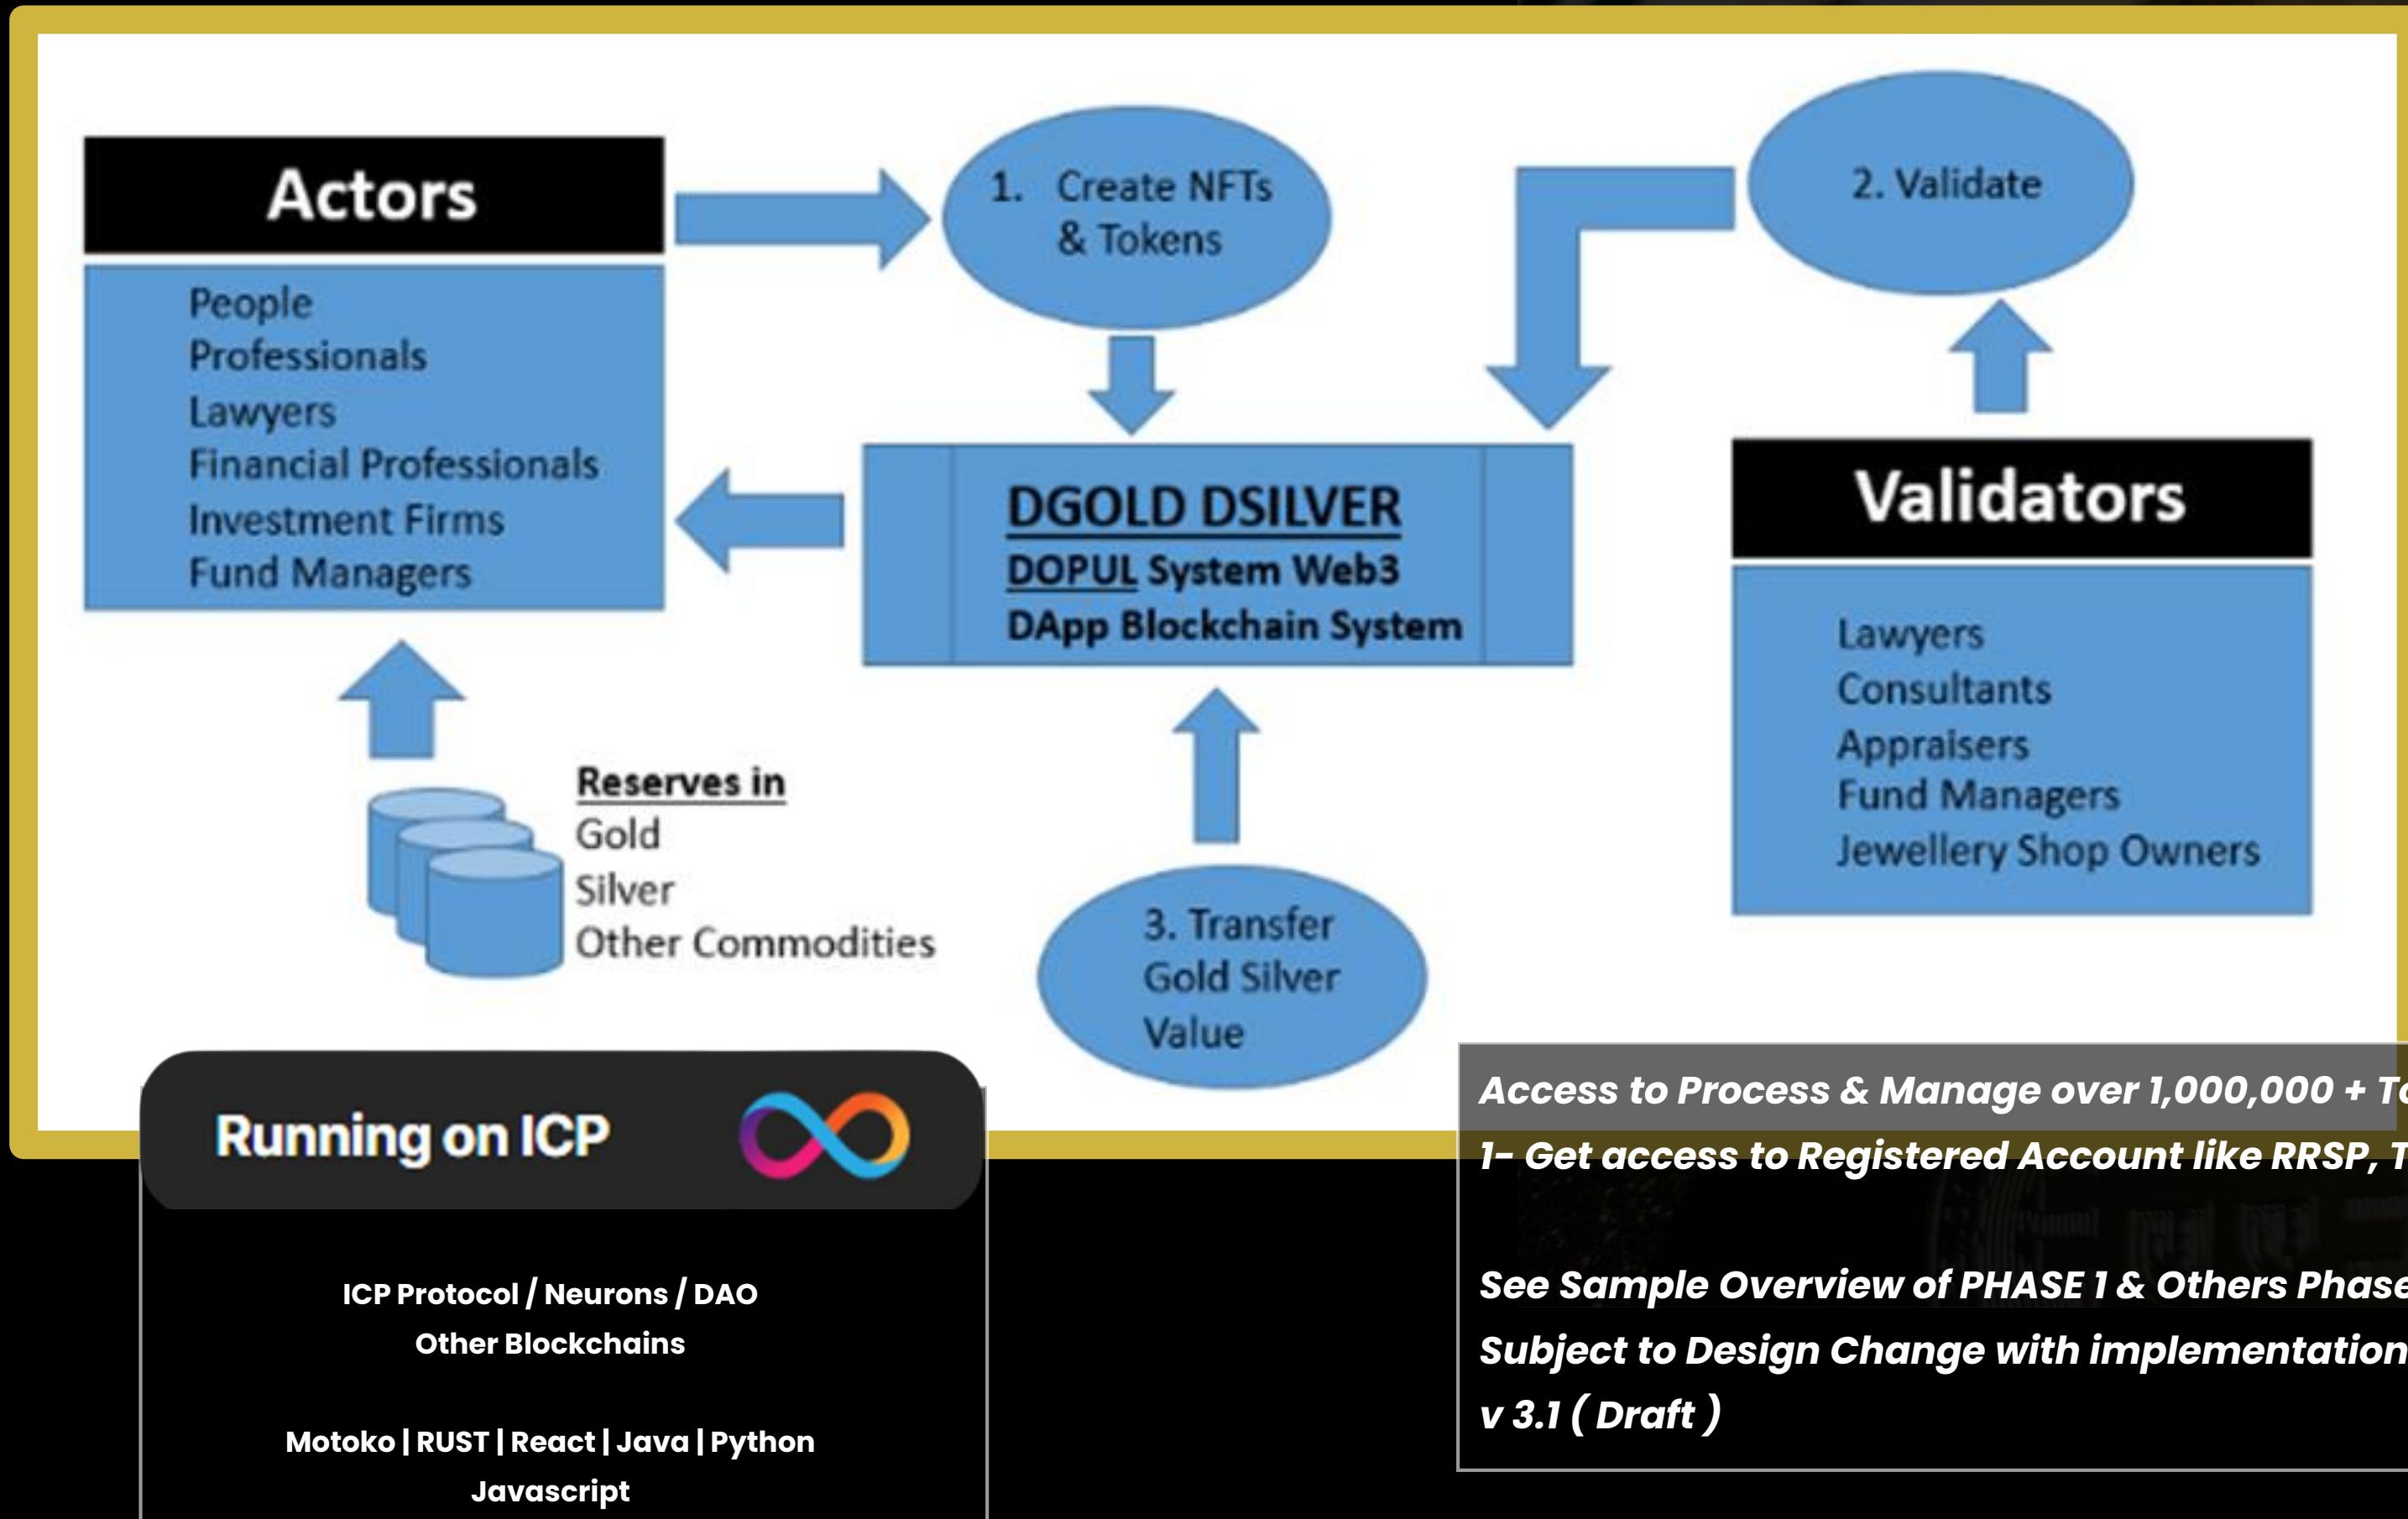

9 Success Factors for Dopul Solution

1. Data Encryption
2. Robust Authentication: multi-factor authentication and identity verification for Right People
3. Strong Security Features with protection against DDoS attack
4. Smart Contract Security Audits to Create TRUST in Dapps
5. Decentralization and Security
6. Scalability
7. Interoperability and Cross-Chain
8. Reduced Costs and Efficiency
9. Transparency and Trust

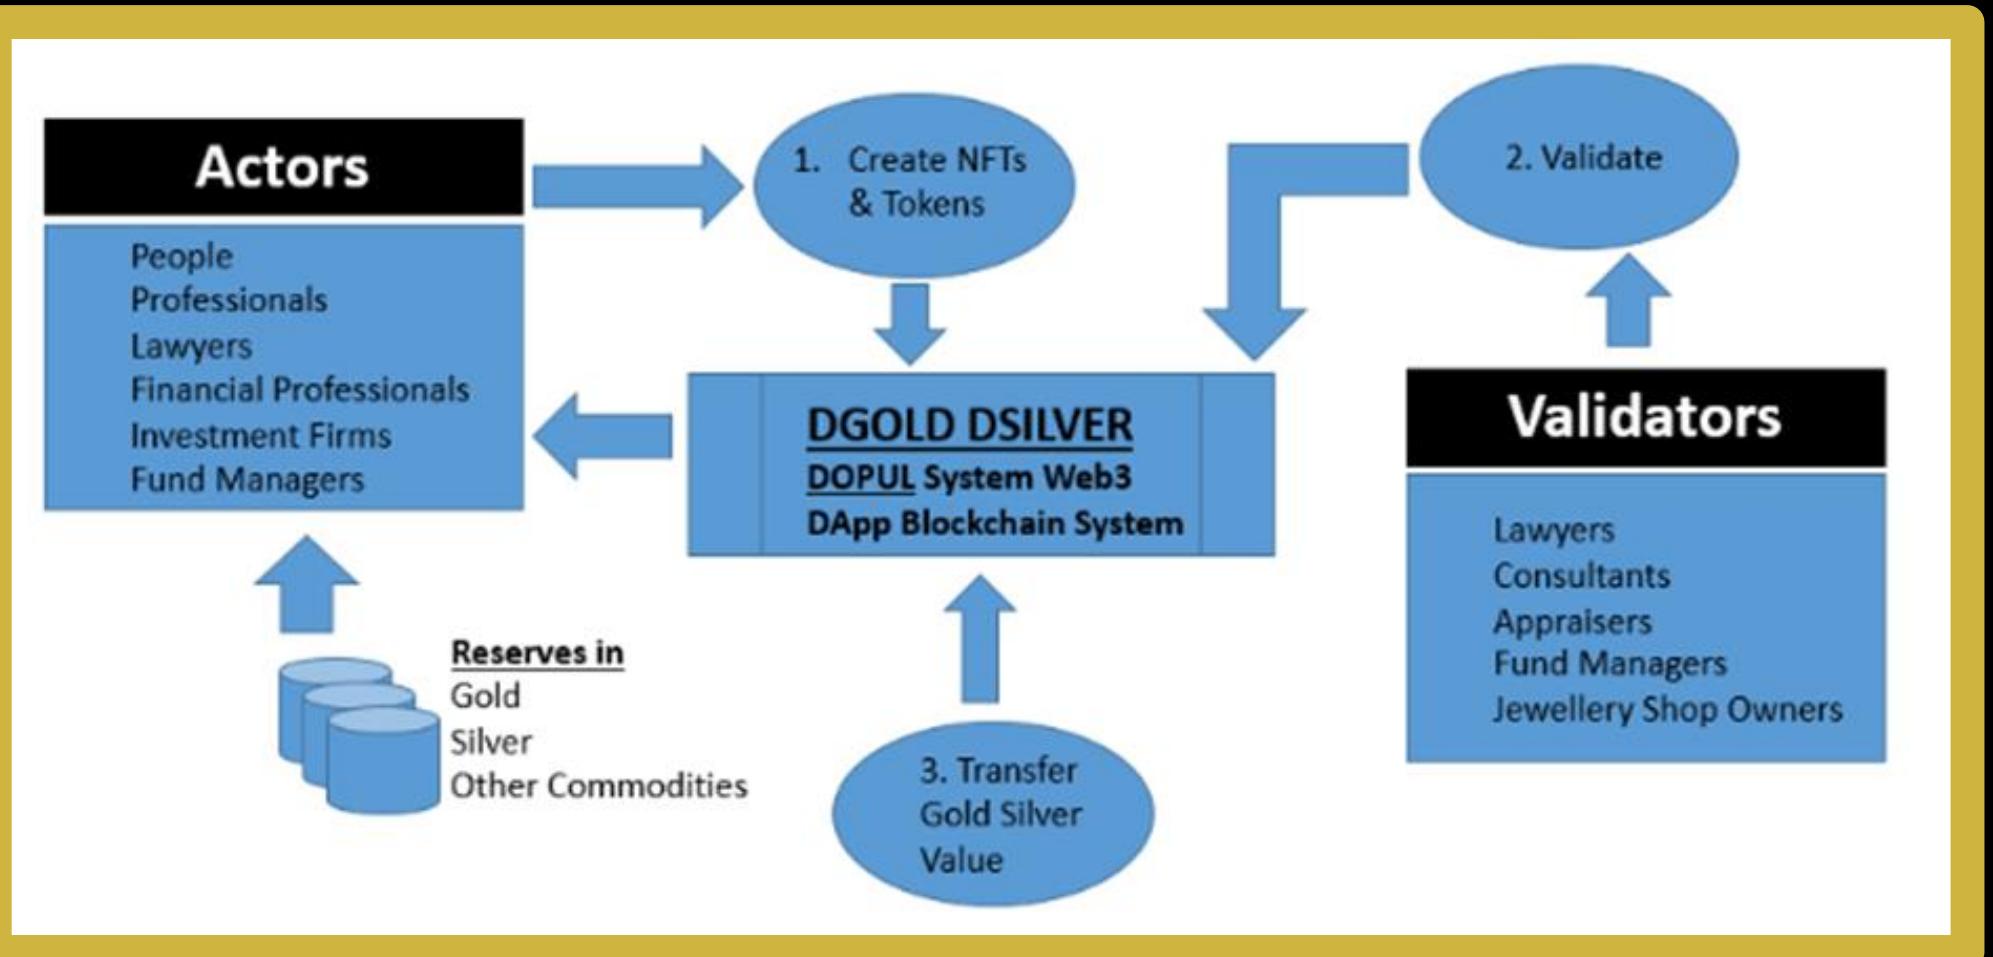

1.2 – Short Introduction - Vision

Phase 1

1.2.1 – Other Phases of Project

Burn Token Management
Burn 0.003 tokens Across various Process + Lifecycle activities

Reward + Utility Support Tokens
For Users + Supporters + Admin for Helping to Build + Grow the DOPUL Network

Zero Knowledge Proof
Validation | Audits | Redeem

Provide Liquidity & Integration to :
Other Gold Silver Projects
PAXG, PMNT, GoldDao etc.

Transfer Self Custody to 3rd Party Custody

a3rd Party Custody ***
(Legal Approved Custodian)

aStaking
(On Approved Collateralization)

DAO Mgmt – DOPUL – Locked
** For Voting & Rewards & Services & Burning

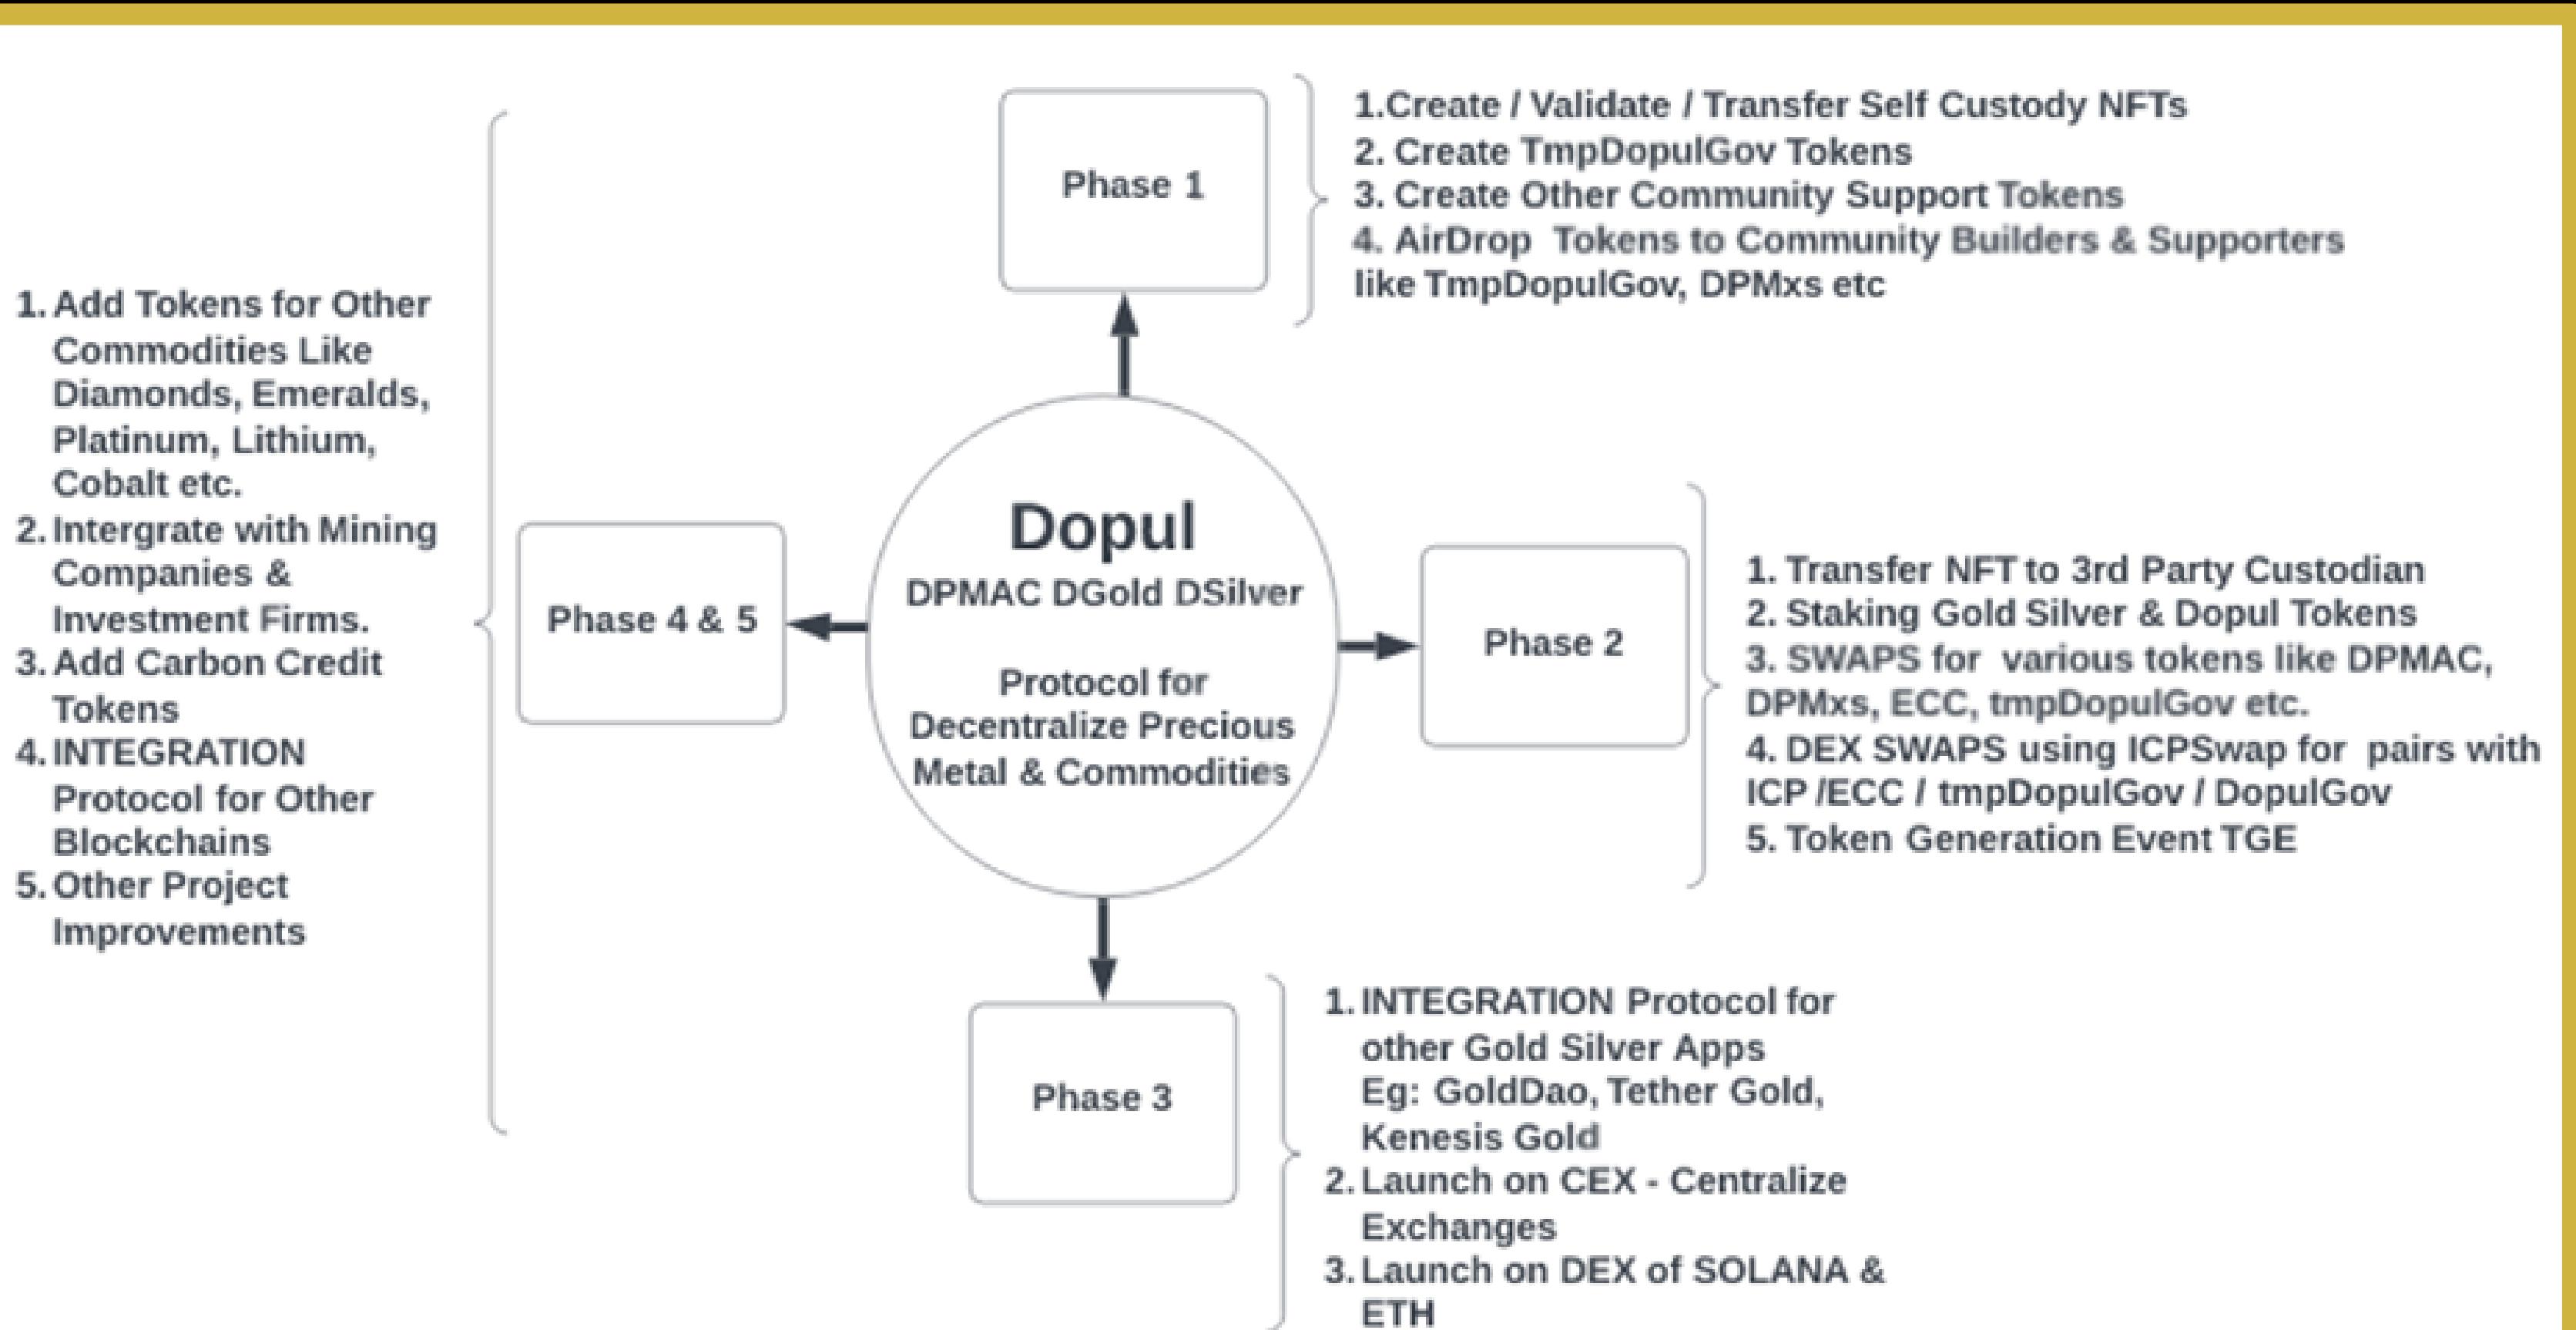

Cross Chain Integration
EVM, BTC, SOL, ADA

Redeem Gold Silver, Commodities for Physical asset or EQUAL Value on Spot price.

DEX & Liquidity & CEX – Swap Gold Silver for other Utility tokens, SOL, ICP, USDT, BTC, Meme Tokens

1.2 – Short Intro – SCOPE of Project

** Decentralize Precious Metals And Commodities (DPMAC) tokens
** Dominus Opulentia (Dopul) Protocol / Decentralize Opulence

SCOPE of Project / Road MAP

Phase 1 (Startup Capital : \$500K to \$10 Million) – Pre Seed

- 1- Launch Create – Validate – Transfer Modules
- 2- Create DopulGov – SNS token – Governance token
- 3- Create Other Community Support Tokens – ECC / DPMxs / TmpDopulGov
- 4- AirDrop Tokens to Community Builders & Developers & Private Club Members Like Z8x, BitcoinBay Etc.
- 5- Build the Foundation & System Infrastructure.

Phase 2 (Raise in various Rounds \$10 Million to \$250 Million) – Series A

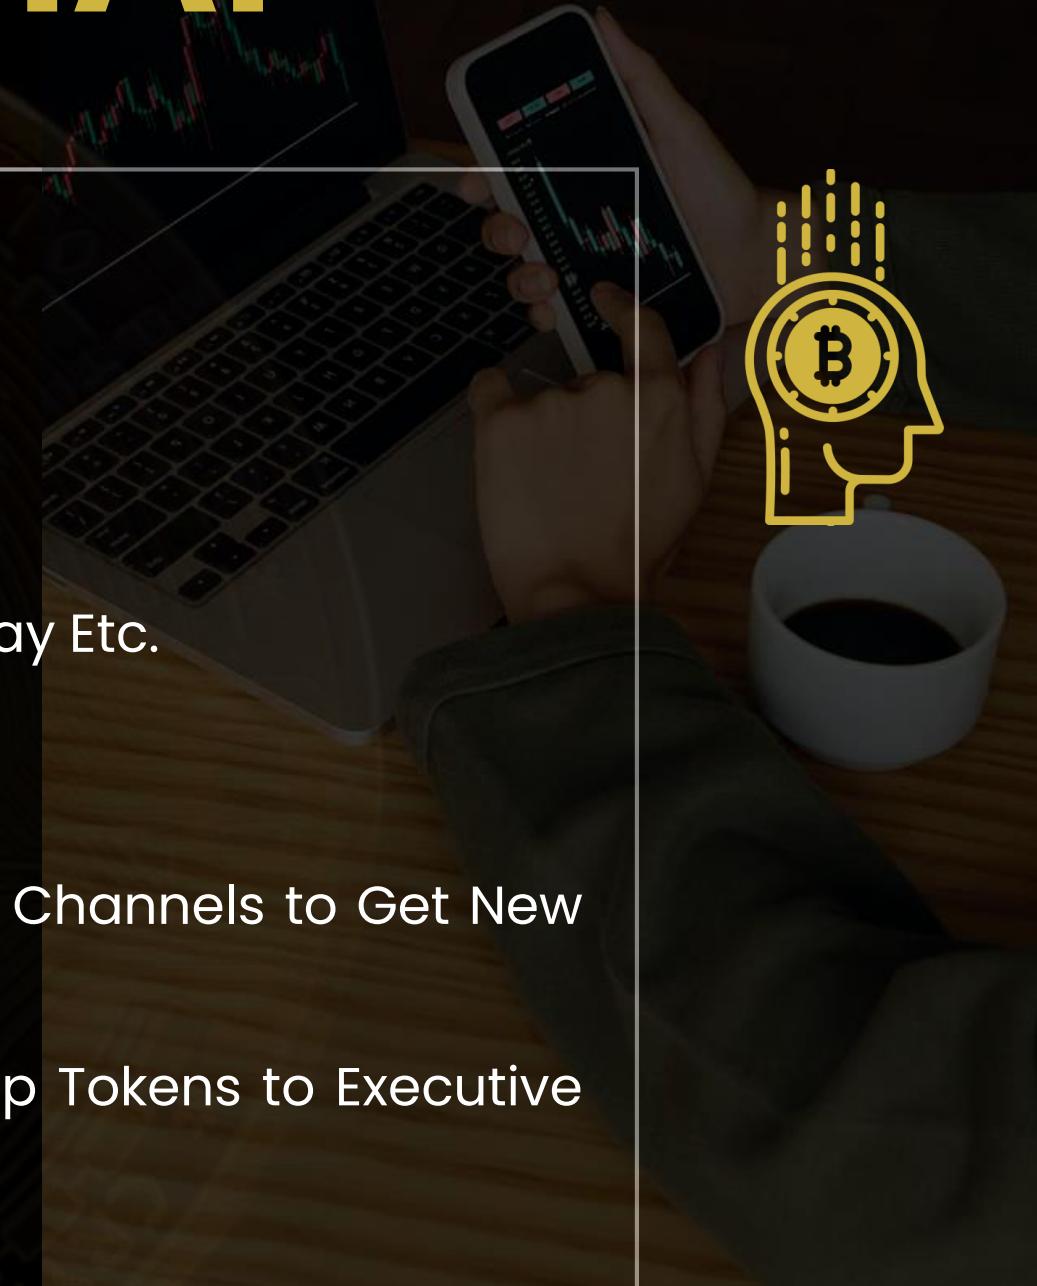

- 1- Build Dex for DGold DSilver, Integrate with ICP Dex, Integrate with GoldDao, Build Social Media Channels to Get New USERS from 25K to 1 million plus
- 2-Token Generation Event. Assign Tokens to Treasury Dao, for Distribution Management. Air Drop Tokens to Executive Support Team, Teams, Project supporters & Marketing Teams.

Phase 3

- 1- Integrate with EVM & Bitcoin Networks, Get Listed on CEXs.

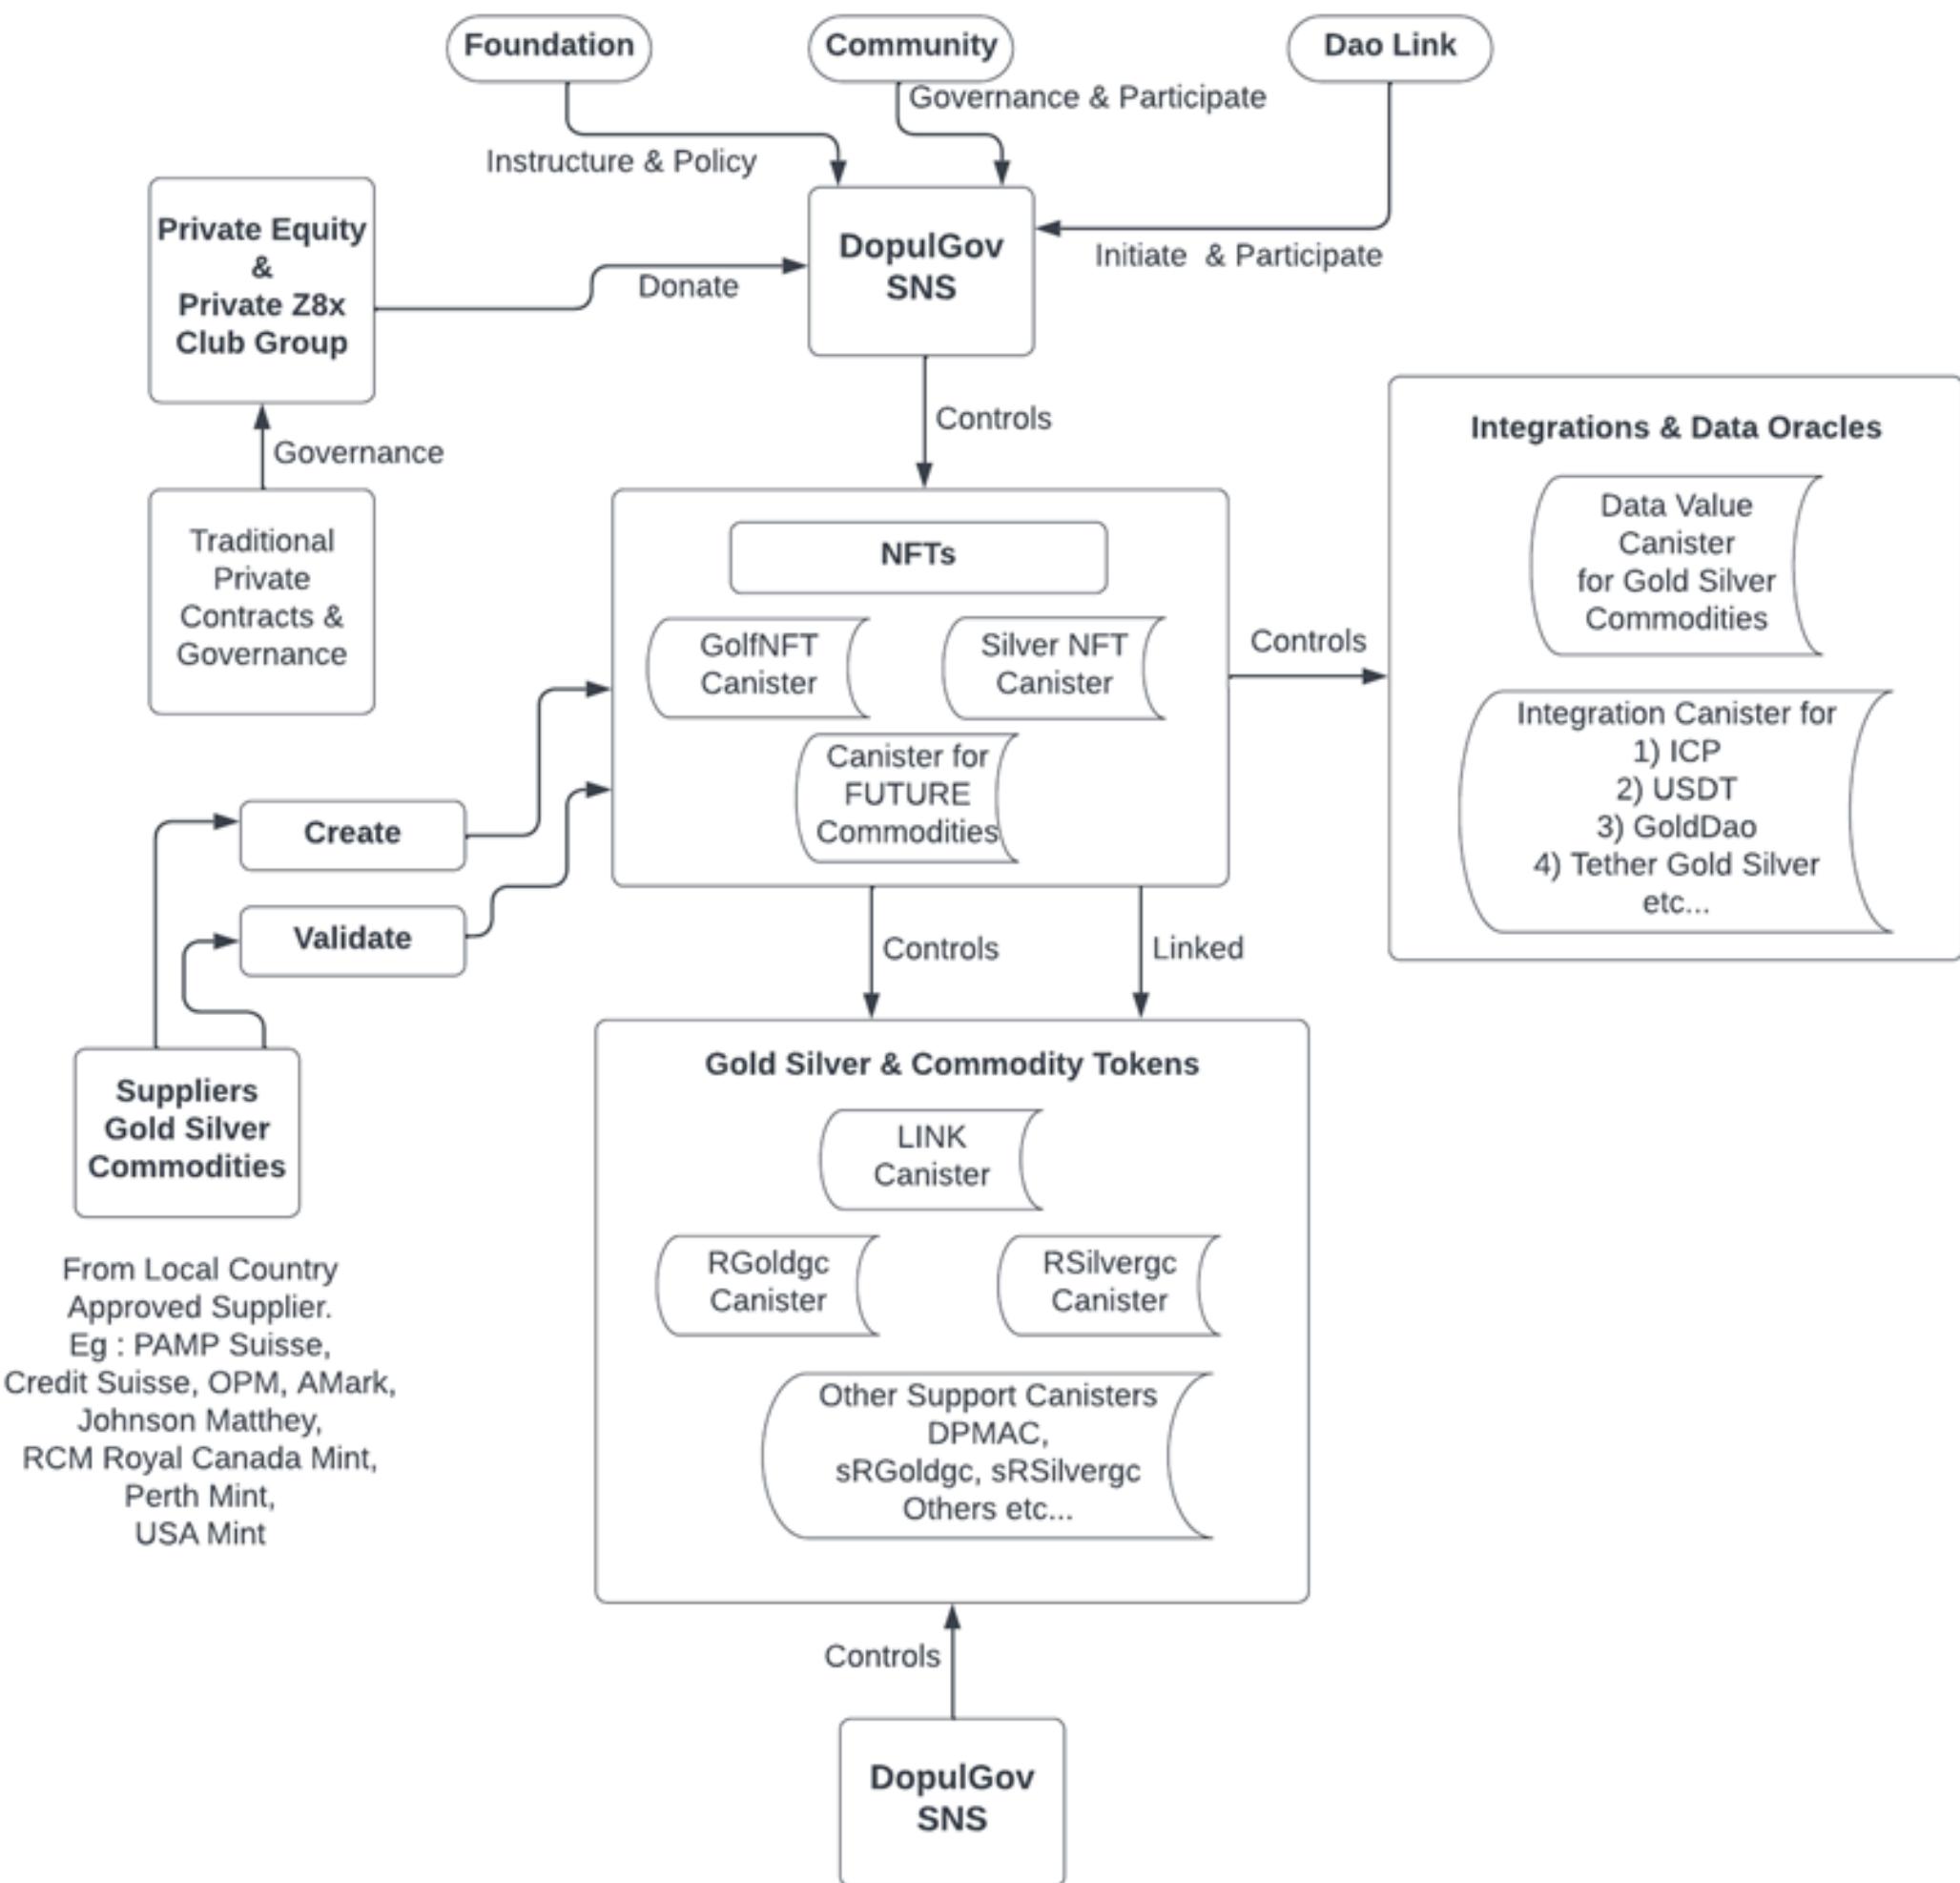

Phase 4 & 5 & 6

- 1- Add Other Commodity Tokens & NFTs like Jewellery, Platinum, Lithium, Diamonds, Sapphires, Emeralds etc
- 2- Other Upgrades for Scaling, Security, and integrations with TradeFi.

2 Eco System

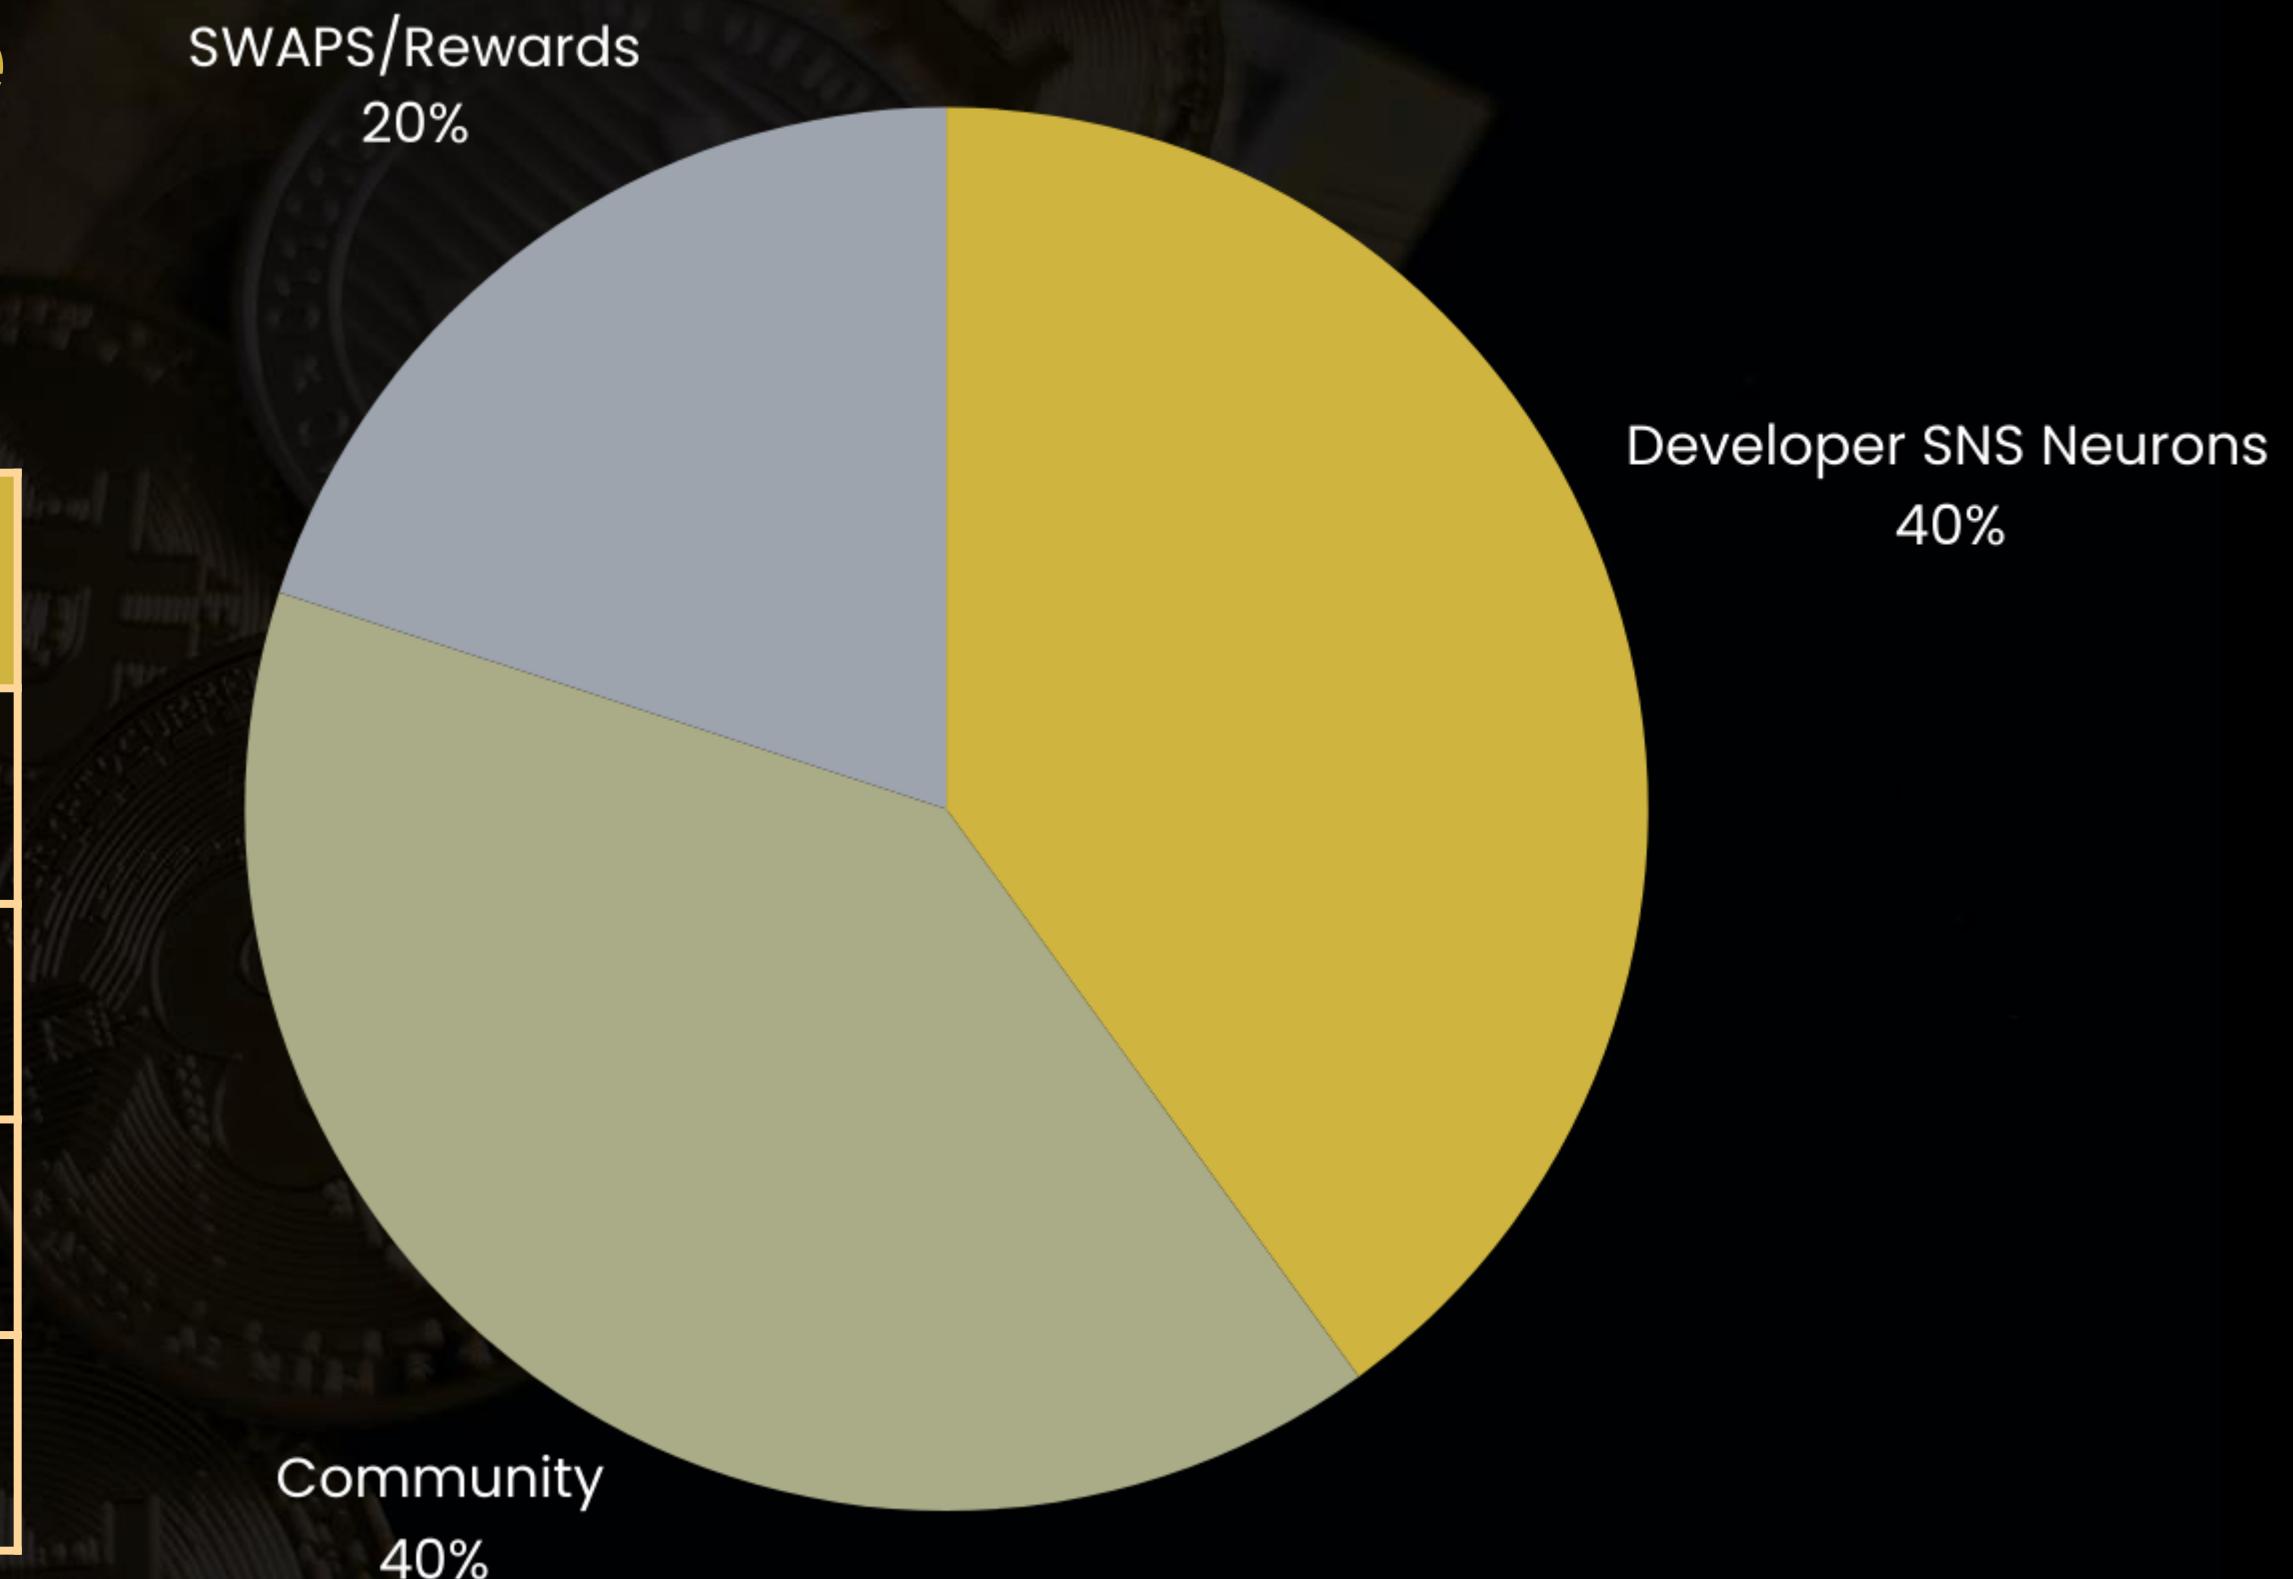

2.1 Contributors & Stakeholders

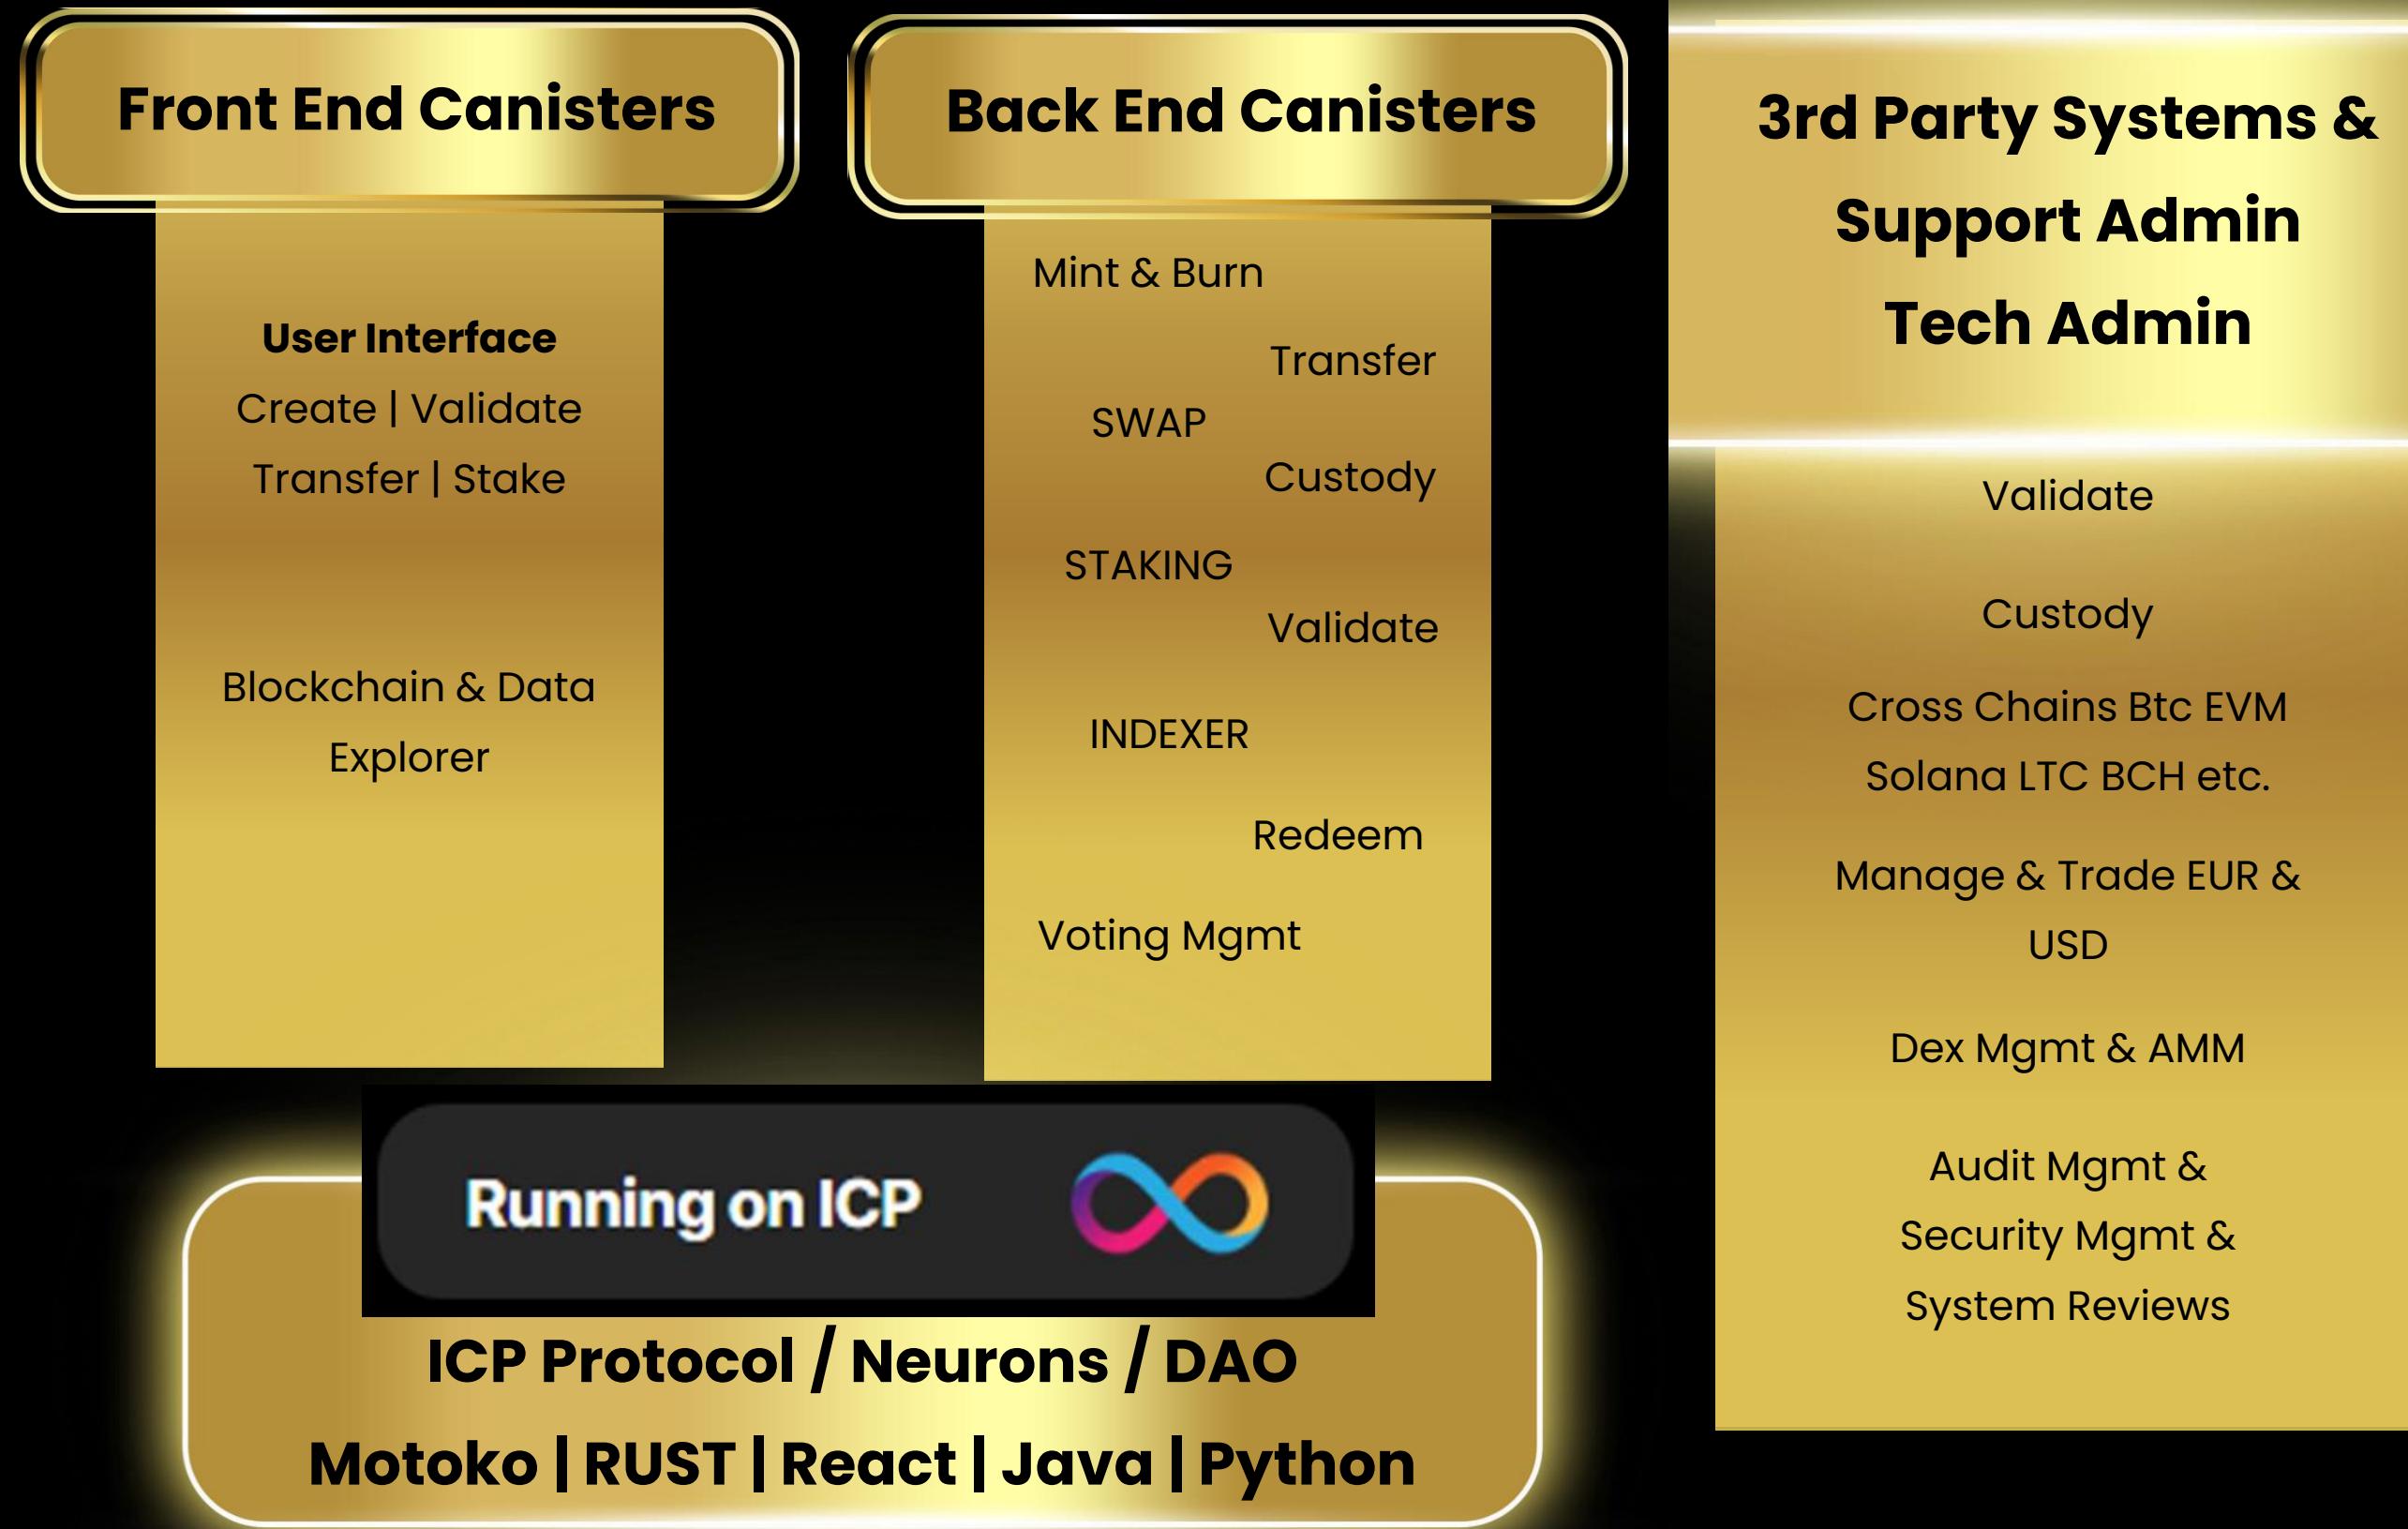

DAO : Goverance & Voting

FIGURE : A

VOTING POWER DISTRIBUTION	
VOTING CATEGORY	PCT% VOTE
DEVELOPER SNS NEURONS	40%
COMMUNITY	40%
SWAPS/REWARDS	20%

4. Technology

What are canisters?

- On the Internet Computer (IC), smart contracts come in the form of canisters.
- These are computational units which bundle together code and state.
- Canisters expose endpoints which can be called both by other canisters and by parties external to the IC, such as browsers or mobile apps.

4.2 Token Standards - WIP

- **Gold & Silver NFT**
- The NFTs are running on the Dopul NFT protocol which also going to support the ICRC-7 NFT standard released by the DFINITY foundation. The supply of DGold Dsilver is variable and directly linked to the amount of gold silver stored in SELF Custody.
- **Dgold**
- The gold and silver tokens are running on the ICRC-1 & ICRC-2 standard of ICP, thereby fully compatible with any other tokens and exchanges on ICP. The supply of DGold is directly linked to the amount of Gold Silver NFT swapped and locked in the swap canister.
- **DopulGov DPMAC ECC**
- These are Utility Tokens, runs on the ICRC-1 & ICRC-2 standards of ICP. These tokens are Used for Governance, Voting, and Rewards. These tokens also assist to create Supply, Demand, and Liquidity.

4.3.1 WHY ICP ?

- **Data Encryption** – Keeping user data safe should be a priority from day one. With ICP, you can implement advanced encryption to ensure data stays protected, whether it's on the move or at rest.
- **Robust Authentication** – Authentication is your first line of defense. ICP makes it easy to integrate multi-factor authentication and identity verification, which means only the right people get access to your dApp. It's a win for security and user experience.
- **ICP's Security Features** – ICP has some serious security muscle built in! From tamper-proof canister smart contracts to protection against DDoS attacks, ICP has your back so you can focus on innovating.
- **Smart Contract Security Audits** – Think of this as your regular dApp check-up. Optimized security audits on your smart contracts help catch potential vulnerabilities before they become issues. On ICP, tools like Motoko Playground make testing a breeze.
- **Building secure dApps isn't just about code—it's about trust.** By prioritizing these security aspects, you're not only protecting your users but also laying the groundwork for a resilient and trusted application.

4.3.2 - Advantages of Using Internet Computer Protocol (ICP)

- The Best Reason to run the DOPUL project entirely on the Internet Computer Protocol (ICP) is strategic, Tech Support and offers several other significant benefits:
- **Decentralization and Security** : ICP provides a highly decentralized infrastructure, ensuring that the Gold project operates on a platform that is not controlled by any single entity. This decentralization enhances the security of the system, as it mitigates the risks associated with centralized control and potential points of failure.
- **Scalability** : ICP's unique architecture allows for scalability without compromising on speed or security. This is crucial for the Gold project as it requires the capacity to handle a large number of transactions and interactions, especially considering the minting and swapping of GLDT and GLDNFT.
- **Interoperability and Cross-Chain** : Functionality ICP facilitates seamless interoperability with other blockchain networks. This feature is particularly beneficial for GLDT, since it is designed to be cross-chain, enabling broader access and liquidity across different blockchain ecosystems.
- **Reduced Costs and Efficiency** : Running on ICP can significantly reduce transaction costs compared to traditional blockchain platforms. This efficiency is vital for maintaining the viability of micro-transactions in the gold trading ecosystem.
- **Transparency and Trust** : The open and transparent nature of ICP aligns with the Gold project's objective of providing a transparent and trustworthy platform. Users can verify transactions and the authenticity of their investments, reinforcing trust in the system.

By leveraging the Power of ICP, the DOPUL project is positioned to offer a robust, scalable, and secure platform for integrating physical gold silver & other other commodities with the digital financial ecosystem, while ensuring transparency, efficiency, and compliance with regulatory standards.

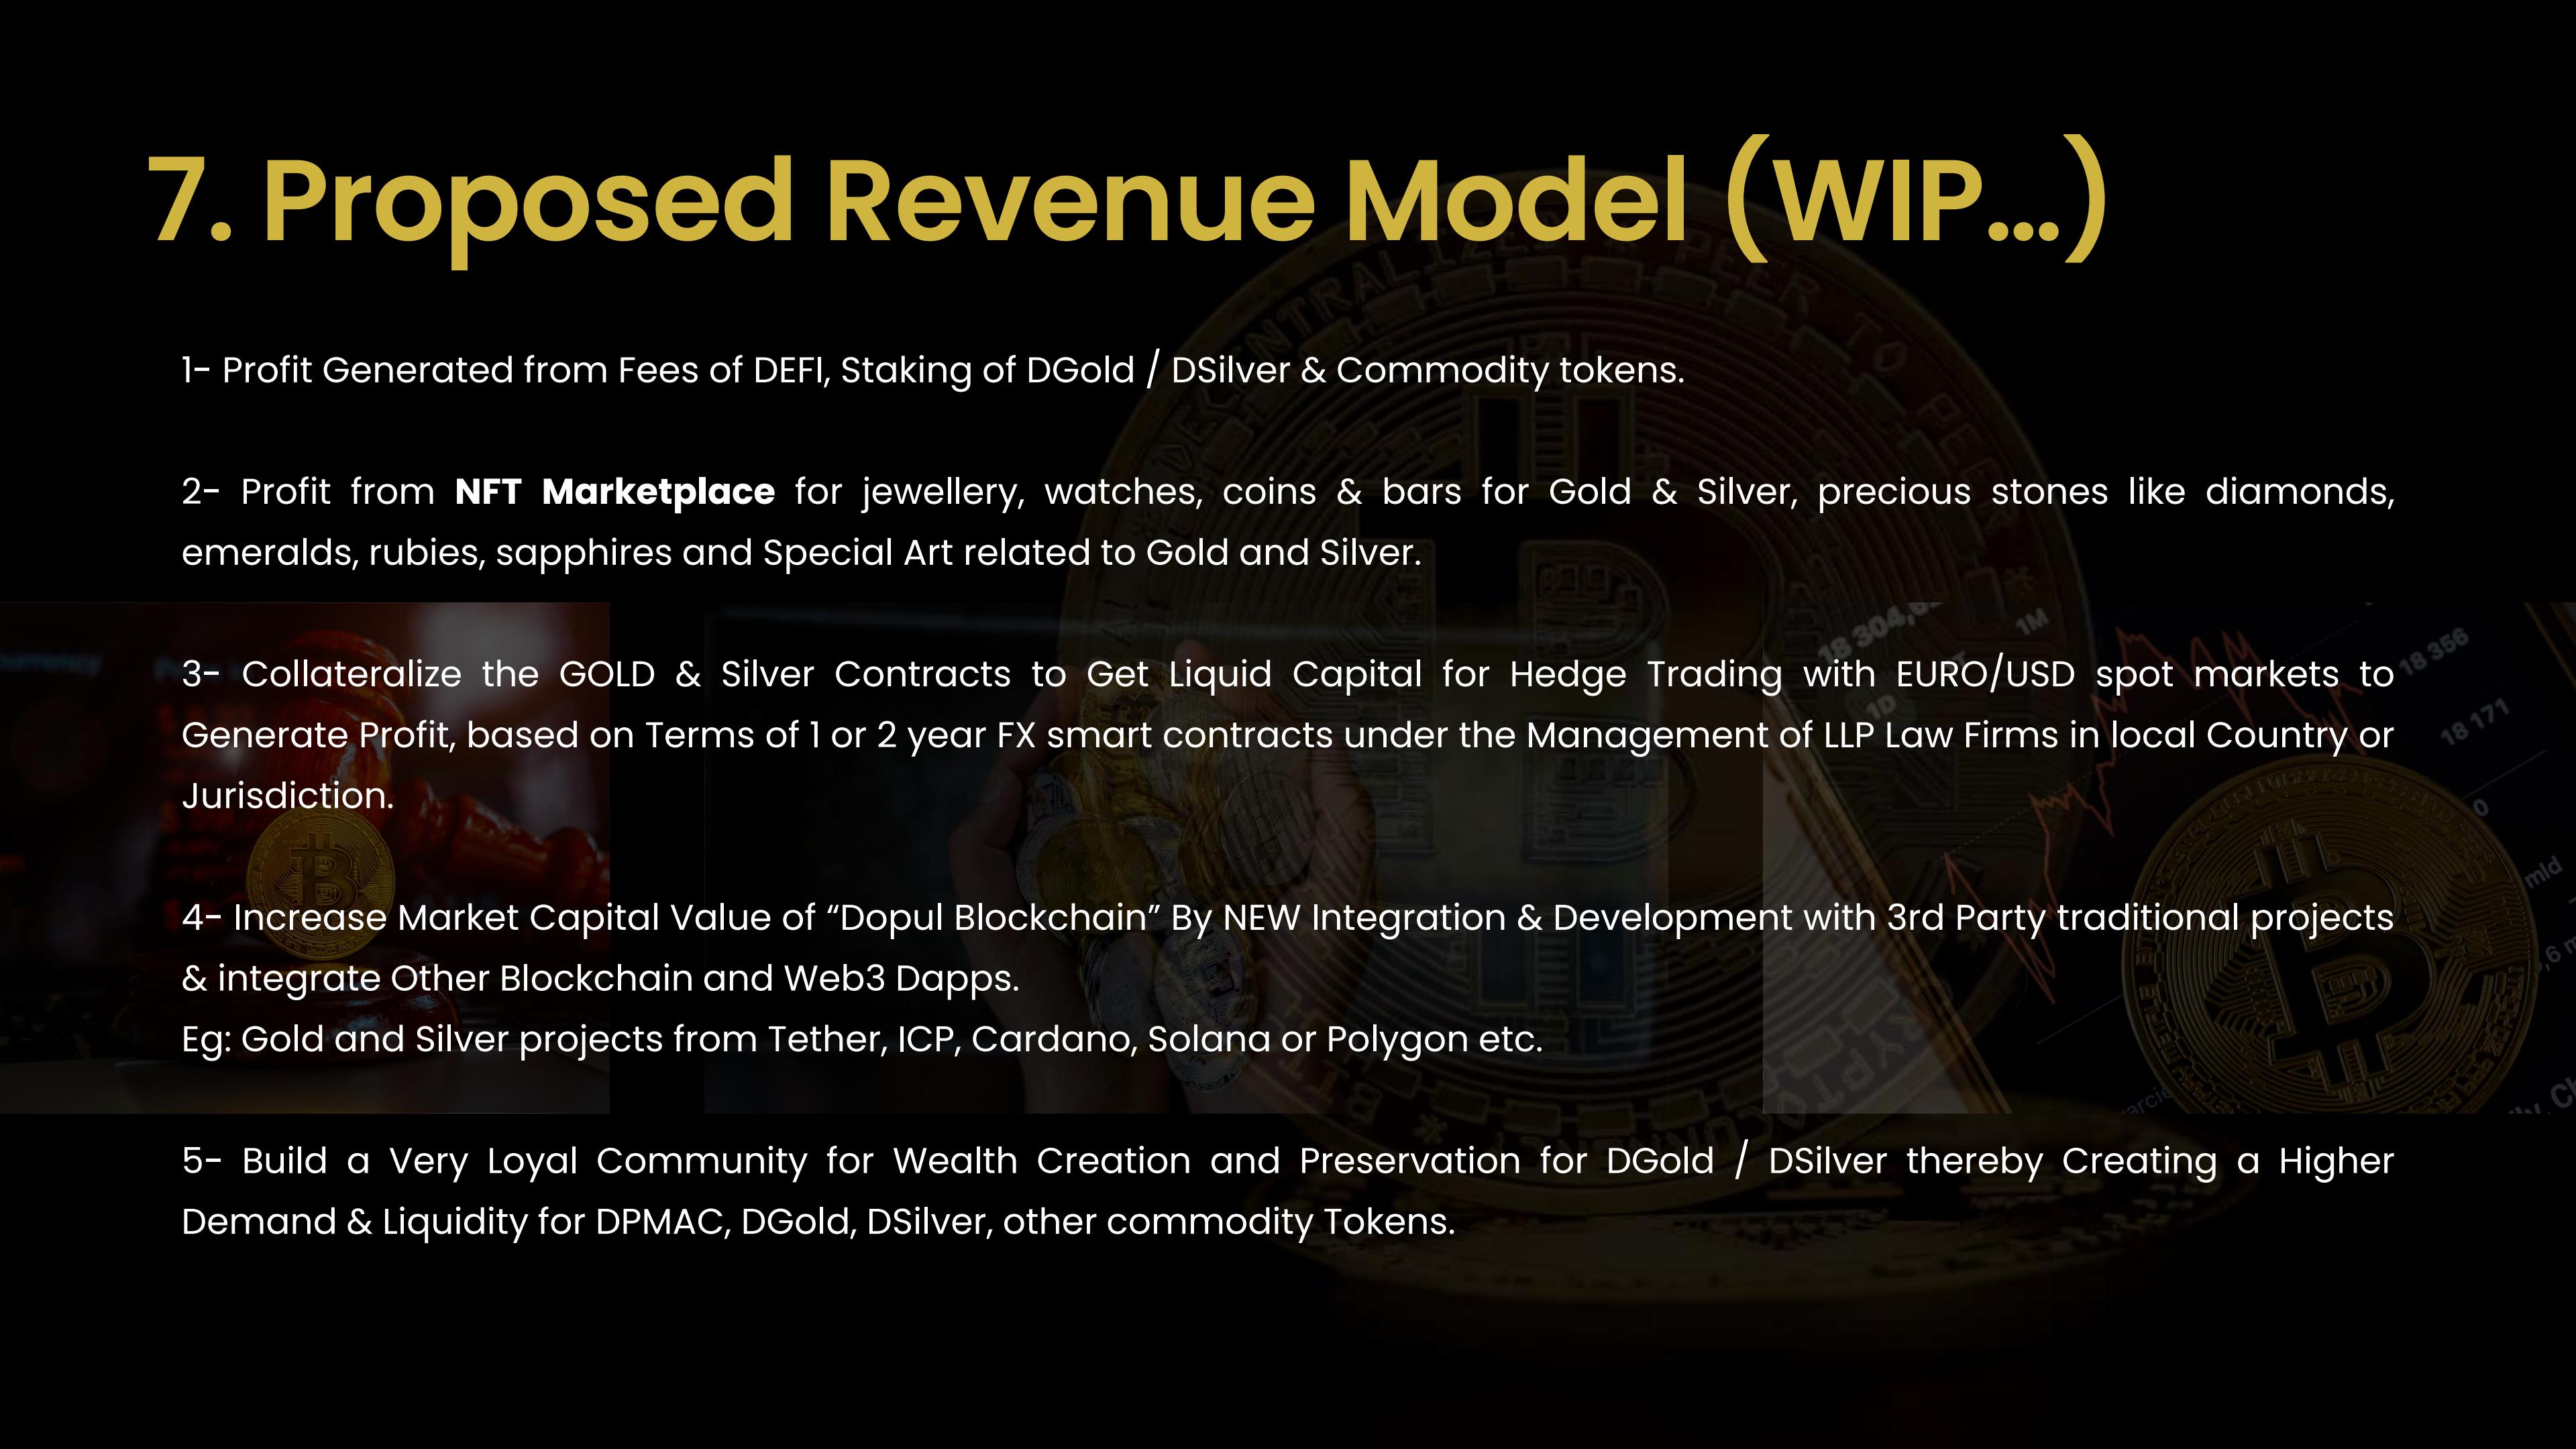

6. Marketing Strategy

**Education & Training &
Conferences & Shows**

**Air Drop (Millions of DPMAC & ECC) to On Board New
Users, Validators, and Business Professionals**

**Provide Joint Ventures & GRANTS to Build Cross Chain
Apps OR Integrate with TradeFi**

7. Proposed Revenue Model (WIP...)

- 
- 1- Profit Generated from Fees of DEFI, Staking of DGold / DSilver & Commodity tokens.
 - 2- Profit from **NFT Marketplace** for jewellery, watches, coins & bars for Gold & Silver, precious stones like diamonds, emeralds, rubies, sapphires and Special Art related to Gold and Silver.
 - 3- Collateralize the GOLD & Silver Contracts to Get Liquid Capital for Hedge Trading with EURO/USD spot markets to Generate Profit, based on Terms of 1 or 2 year FX smart contracts under the Management of LLP Law Firms in local Country or Jurisdiction.
 - 4- Increase Market Capital Value of "Dopul Blockchain" By NEW Integration & Development with 3rd Party traditional projects & integrate Other Blockchain and Web3 Dapps.
Eg: Gold and Silver projects from Tether, ICP, Cardano, Solana or Polygon etc.
 - 5- Build a Very Loyal Community for Wealth Creation and Preservation for DGold / DSilver thereby Creating a Higher Demand & Liquidity for DPMAC, DGold, DSilver, other commodity Tokens.

Team Overview

- **Jerry Cabral – Founder / Project Director**
- <https://www.linkedin.com/in/lotuscube>
 - Expertise with Traditional Finance Private Equity & Private Capital for Real Estate Projects, TECH Projects, Blockchain Projects & New Business Ventures for Potential 5x to 1000x Growth.
 - Over 20 Yrs. experience in Software Development, Blockchain projects, Fund Raising, Real Estate, Mortgage & Credit Finance consulting, Tax Management, Investor Relations & Business Development.
 - Act as Advisor/Consultant for New Start ups & Fundraising. I love to Help New Start Ups Get Success & Funding.
 - **See Below some of the Projects I have Worked with:**
 - <https://www.bytezilla.ca/>
 - (Blockchain Solutions Partner)
 - <https://www.unitedrealtycanada.com/>
 - (Real Estate Investment & Private Contracts)
 - <https://z8xplus.io/>
 - (Private Club DAO for members, professionals and supporters. NOT open to Public.)
 - www.Cfotax247.com
 - (High Networth Tax Planning Strategy)
 - Also Provided Software Consulting Services to Nationwide Insurance Ohio, TransCanada Pipeline Canada, EXIM Bank India, Holiday Inn India, Entergy Corp USA, Whirlpool HQ Michigan USA, Philips Lighting / ORIGIN International Netherlands, Glaxo Smithkline UK etc.

Team Overview

- **Anishkumar Patel – Blockchain & Smart contract Developer**
 - <https://www.linkedin.com/in/anishkumar-patel>
 - 3 Years experience in Software Development + 1 Year Blockchain.
 - Anish is the LEAD Developer for DGold DSilver Project. Also he will build the project and post on Github.
- **Skywalker G – Blockchain & Smart contract Developer**
 - 3 Years experience as Blockchain engineer and QA.
- **Sahil Soni – UI & Full Stack Developer**
 - <https://www.linkedin.com/in/lialh4/>
 - 3 Years experience in Software Development.
- **Mal Davies – QA & Testing**
 - <https://www.linkedin.com/in/mal-davies-ma-34707a7/>
 - Over 20 Years experience in QA and testing in Banks And Insurance sector.
 - Companies. Worked with CIBC, TD, BMO, RBC, Sun Life, Clarica, Aviva insurance etc.
- **Jerry & Leo Team – Bitcoin Bay – QA & Testing**
 - <https://ca.linkedin.com/company/bitcoinbay>
 - Over 20 Years combined experience working on Crypto & Blockchain projects. Will provide consulting to Review, Test, and Audit Code.
